An investment in the Equity Shares involves a high degree of risk. The risks and uncertainties described in this section are not the only risks that we currently face. Additional risks and uncertainties not currently known to us or that are currently believed to be immaterial may also have an adverse impact on our business, results of operations and financial condition. If any of the following risks, or other risks that are not currently known or are currently deemed immaterial, actually occur, our business, results of operations and financial condition could be materially and adversely affected and the price of our Equity Shares could decline, causing the investors to lose part or all of the value of their investment in the Equity Shares. The financial and other related implications of the risk factors, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors.

This Prospectus also contains forward-looking statements that involve risks and uncertainties. Our Company's actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus. Please refer to the chapter titled "Forward Looking Statements" beginning on page 16. To obtain a complete understanding, Prospective Investors should read this section in conjunction with the chapters titled "Our Business" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" beginning on pages 121 and 257, respectively, as well as the other financial and statistical information contained in this Prospectus. Unless otherwise stated, financial information in this section is derived from our restated financial information included in section "Financial Information" beginning on page 200. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue including the merits and the risks involved.

Materiality

The risk factors have been determined on basis of their materiality. The following factors have been considered for determining the materiality.

1. Some risks may not be material individually but may be material when considered collectively.
2. Some risks may have an impact, which is qualitative though not quantitative.
3. Some risks may not be material at present but may have a material impact in the future.

A. INTERNAL RISK FACTORS

1. Underutilization of capacity of our Existing Manufacturing Facilities or Proposed Project may adversely affect our business, results of operations and financial condition.

Our Company currently has facilities for manufacturing of 12,000 MTPA of wire rope which are currently utilised to the extent of 53%. We propose to set up a fully integrated manufacturing facility with installed capacity of 66,000 MTPA. The proposed capacity would be more than five times of our existing capacity. We will incur significant capital expenditure on setting up the same. We cannot assure that we shall be able to utilize our existing or proposed manufacturing facilities to their full capacity or up to an optimum capacity, and non-utilisation of the same may lead to loss of profits or can result in losses, and may adversely affect our business, results of operations and financial condition. Even use of the proposed production capacity is subject to several variables like availability of raw material, power, water, proper working of machinery, orders on hand, supply/demand, manpower, etc.

We state that present under-utilization is on account of mismatch of capacity of various machines, old machines and dependence on wire suppliers for timely supply, quality of wires and shortage of man-power. While setting-up of fully integrated manufacturing facility would to an extent address some of the reasons of underutilization of present capacities, there cannot be any assurance that the proposed capacity would be utilized to its full extent.

2. In the event there is a shortfall in receipt of issue proceeds from this Issue, we may be unable to meet the equity requirement for the Proposed Project at Chalisgaon which may have a bearing on the completion of our Project on time.

In case of any shortfall of the proceeds raised from this Issue, there can be no assurance that we will be able to raise the funds through other sources to meet our obligations of meeting equity contribution for our Proposed Project. In case of shortfall in the proceeds of this Issue which are to be utilized for meeting the objects of the Issue, the shortfall will be met by such means as are available to our Company at such future time and at the discretion of the management, including by way of cash available with us or by any other means permissible under law. We cannot assure that we will be able to arrange for adequate cash or will be able to procure further loans to meet the funding requirements. Any failure to meet the additional funding requirements will have a material adverse effect on the implementation of the Proposed Project.

We may also be required to adhere to certain restrictive covenants as regards raising of finance for the project from means other than those sanctioned under our present financing documents. Any failure or delay on our part to raise funds from the Issue or any shortfall in the issue proceeds and subsequent inability of our Company to source alternate means of finance may delay the implementation of our project and could adversely affect our growth plans.

3. Any failure on the part of our Promoters to fund their portion of Project Cost may adversely affect our growth plans and the implementation of Proposed Project may be jeopardized.

Other means of financing of our objects to the extent of Rs.5497.99 lacs forming part of the Promoter Portion towards Proposed Project as required from time to time prior to disbursement of the term Loan, more particularly set out in the chapter titled “*Objects of the Issue*” beginning on page 82 of this Prospectus are out of internal accrual or non-convertible preference shares or ICD (collectively “**Promoter Portion**”). In case of shortfall of Promoter Portion, there can be no assurance that we will be able to raise the funds through other sources to meet the obligations of Promoter Portion. Any failure on the part of our Promoters to bring in their share of Promoter Portion will adversely affect the financing arrangements with Term Loan Consortium Lenders, which may result into withholding of disbursement by them and implementation of Proposed Project may be jeopardized.

4. The Proposed Project is appraised by an appraising agency and contents of the appraisal report are withheld.

The Proposed Project of our Company has been appraised by an appraising agency. Our Term Loan Consortium Bankers have relied upon the report of the appraising agency while sanctioning term loans facilities to us. Details of appraising agency and contents of the report, schedule of implementation are withheld with us as the appraising agency has denied its consent for inclusion of its name and contents of the report in any offer document. Consequently, we are unable to provide any particulars/contents of the report including but not limited to the implementation of the Proposed Project and costs as has been ascertained by the appraising agency. Further, we may not be able to otherwise share the contents of the said report to any third parties including the current and prospective shareholders of our Company. The Term Loan Consortium Bankers have caused the LIE Report prepared and based on which have made disbursements to the Company. The Company has obtained this LIE Report which inter alia covers all the material aspects included in the appraising agency’s report. This report has also been included as one of the material documents that is available for inspection.

5. Delay in schedule of implementation may subject our Company to risks related to time and cost overrun may have a material adverse effect on our business, results of operations and financial condition.

The scheduled completion target for our Proposed Project at Chalisgaon was as estimated by our management, as per the report submitted by our Company to its Term Loan Consortium Bankers for availing bank finance for the Proposed Project. The schedule of implementation of the Proposed Project has undergone a change because of delay in title clearance of a part of the land taken on lease from MIDC. As a result, the commercial production date, as envisaged, has been revised and further extended by a period of 12 (twelve) months. The Term Loan Consortium Bankers have, prior to disbursements under the term loan, approved the commercial production date to be December 31, 2016. However, there is no cost increase consequent to such revision of commercial production date. There has been change in few specifications of certain machinery and equipment and in certain cases, the machinery supplier has changed, on account of which either a machinery has been added/replaced/removed, which has resulted in a cost increase. Additionally, there has been an upward fluctuation in the foreign exchange rates, consequent to which there has been an increase in the total project cost of the

Proposed Project. The Proposed Project may be subjected to delays as a result of, among other things, contractor performance shortfalls, unforeseen engineering problems, dispute with workers, force majeure events, availability of financing, unanticipated cost increases or changes in scope and inability in obtaining certain property rights, fuel supply and government approvals, any of which could give rise to cost overruns or the delay in our implementation schedule. Any delay in completing the Proposed Project due to any reason whatsoever may result in commencing operations in an increased competitive environment along with significant cost and time overruns. Due to these time and/or cost overruns, the overall benefits of such plans to our revenue and profitability may decline and it may significantly increase our interest costs. Such a scenario may adversely impact the cash flows and will have an adverse effect on our business, results of operations and financial condition.

6. *Our Company was acquired by one of our Promoters, Gaji Mercantile Private Limited vide the SPA and hence, our Promoters have limited knowledge and records of documents relating to corporate actions undertaken by our Company including RoC filings.*

Until the year 2010, our Company was owned, managed and controlled by the Shah Group. Subsequently, in the year 2010, one of our corporate Promoter - Gaji Mercantile Private Limited purchased 1,06,75,490 equity shares of our Company vide SPA. At the time of handing over of the management, the previous management had informed our current Promoters that certain documents pertaining to corporate, accounting, financial, legal documents and other statutory records since incorporation were not available, misplaced, destroyed or otherwise not traceable. Hence, we do not have complete set of such records. Further, our Company does not have any supporting documents and/or RoC filings, such as Forms 2, Form 23 and Forms 5, made in the period prior to the acquisition of the aforesaid Equity Shares by our Corporate Promoter, in order to ascertain increase in the authorised capital of our Company and allotments made during the period from July 25, 1986 till March 31, 2010. Moreover, at the time of incorporation, our Company had 15,000 Equity Shares and 10,000 unclassified shares. However, our Company does not have in its records, documentation reflecting the classification of the unclassified shares as Equity Shares or any other kind of shares. Further, we do not have any supporting documents to ascertain whether our Company has at any point of time entered into any arrangement or scheme of amalgamation or has undertaken revaluation of its assets, has issued any shares out of its revaluation reserve, or has issued any shares for consideration other than cash or has issued shares by way of capitalisation of its reserves, during the period from July 25, 1986 till March 31, 2010. There may be certain old cases or disputes between our Company and other parties, which were initiated by or against the Previous Management. 8. *Our Proposed Project will be operated on lands which have been taken on long lease basis from M.I.D.C.*

The land on which our Proposed Project is located, is taken on lease basis by us from M.I.D.C. For the purpose of facilitating bank finance, the MIDC, at the request of our Company, has granted a pre-determined lease in favour of our Company under a Pre-Determined Lease Agreement dated March 31, 2015. As per the terms of the said Pre-Determined Lease Agreement, our Company is required to complete the construction of at least 20% built-up area for the project before November 8, 2017. The balance construction is to be completed by our Company within a period of 10 (ten) years from November 8, 2017. In the event, our Company fails to complete the project including construction of the factory building within the stipulated time period, comply with the stipulations contained in the agreement or commits default in payment of the stipulated charges, then the M.I.D.C. shall have the right to resume possession of the aforesaid land and everything thereon.

A loss of our Company's leasehold interests, including through actual or alleged non-compliance with the terms of the lease arrangement and M.I.D.C.'s requirements, the termination of lease by the M.I.D.C., or our inability to secure renewal thereof on commercially reasonable terms when it expires, would interfere with our ability to implement the Proposed Project thus affecting our financial performance. The cost of relocating a site is significant. There is no assurance that our Company will be able to procure alternate sites at favourable pricing terms. Any such relocation and/or increase in the costs incurred due to such relocation could cause disruption of our business and may adversely affect our financials as well as our ability to retain our customers. In addition, we may not always have the ability to access, analyse and verify all information regarding titles and other issues prior to entering into lease arrangements in respect of the site of the Proposed Project and to the extent there is any defect in the titles of any of such leased site, our ability to continue operating at such leased sites may be adversely affected.

Further, the deployment of the funds is based on certain assumptions and strategy which our Company intends to implement in future. The funds raised from the Issue may remain idle on account of change in assumptions, market conditions, strategy of our Company, etc. For further details on the use of the Issue Proceeds, please refer to the chapter titled "*Objects of the Issue*" beginning on page 82 of this Prospectus.

Any developments in the proceedings, such as a change in Indian law or rulings against us, our Directors and/or our Promoters by appellate courts or tribunals may constrain us to make provisions in our financial statements that could increase our expenses and current liabilities and the same may result in an adverse material impact on our business, goodwill, results of operations and financial condition. 13. *We require number of approvals, licenses, registrations and permits for our business and our Proposed Project and failure to obtain or renew them in a timely manner may adversely affect our operations.*

We require several statutory and regulatory permits, licenses and approvals to operate our business and our Proposed Project, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Our Company has filed (i) an application for registration of Establishments Employing Contract Labour under application ID 100003771512 before the office of the Assistant Commissioner of Labour, Jalgaon, Nashik; (ii) an application, dated December 7, 2015, for renewal of the Consent to Operate under Air (Prevention and Control of Pollution) Act, 1981, Water (Prevention and Control of Pollution) Act, 1974 and Authorisation under Hazardous Wastes (Management, Handling & Trans Boundary Movement) Rules, 2008 for the Atgaon Facility; and (iii) an application for revalidation of building sanction plan, dated February 4, 2016, filed with the Executive Engineer, MIDC, in respect of the building sanction plans for the proposed and the same are pending receipt. While we believe that we will be able to obtain the required permits and approvals as and when required, there can be no assurance that the relevant authorities will issue any or all requisite permits or approvals in the timeframe anticipated by us, or at all. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. 14. *We have entered into a Memorandum of Understanding dated 4th February, 2015 (“MoU”) with Swan Energy Limited (“the Purchaser”) for sale of land situated at Village Palshin, Taluka Shahapur, District Thane, admeasuring 39.21 Acres. Non-completion or delay in completion of the transaction by the Purchaser may adversely affect our cash flow.*

BharatWire Ropes Limited

We had purchased land situated at Village Palshin, Taluka Shahapur, District Thane, admeasuring 39.21 Acres for our Steel Wire and Wire Rope Factory. However, since we have shifted the said project to Chalisgaon, the said land has not been put to use for the purpose of Steel Wire and Wire Rope Factory. In view of this, holding the said land is redundant and therefore, we have decided to sell the same subject to the provisions of the applicable laws to the Purchaser and/or its nominees for a consideration of Rs. 3200 lacs and on the terms and conditions agreed with them under the MoU and other writings executed with it from time to time. In terms of the MoU, the Purchaser was required to pay a sum of Rs. 3000 lacs within two months from the date of execution of the MoU, i.e. April 4, 2015. The Purchaser has paid a sum of Rs. 2200 lacs till now. The terms of the MoU were mutually amended, by virtue of which the balance sum of Rs. 1000 lacs has been agreed to be paid on or before 30th June, 2016. As per the terms agreed with the Purchaser, in case of failure on the part of the Purchaser to complete the transaction, the amounts paid by it to us may be forfeited. Further, in case of failure on our part to comply with the stipulations contained in the MoU, the transaction may be terminated by the Purchaser and we will have to refund the amount paid to us to the Purchaser. In case the transaction is not completed as envisaged or there is a delay in completion of the transaction, the balance consideration payable by the Purchaser to us may not be realised within the time envisaged and such delay may adversely affect our cash flow. Consequently, we may have to borrow the amounts to the extent of refund or non-realisation, as the case may be, from the banks and financial institutions or call upon the Promoters to infuse such amount as and by way of ICDs or by sale of the subject land to any other person or party.

15. *We derive a significant portion of our revenues from our top 10 (ten) customers. The loss of, or a significant reduction in the revenues we receive from, one or more of these customers, may adversely affect our business.*

We derive a significant portion of our revenues from our Company's top 10 (ten) customers. In the Financial Years 2013, 2014 and 2015 and for the period ended November 30, 2015, our top 10 (ten) customers accounted for 47.86%, 45.07%, 49.56% and 64.27% respectively, of our revenue from operations. While our top 10 (ten) customers are not necessarily the same every year, the top (10) ten customers contribute a significant portion of our revenues. In the financial year 2015, our largest customer accounted for 12.47% of our revenues. The loss of business derived from these customers or a significant reduction in, the revenues we receive from, one or more of these customers may adversely affect our business.

16. *Two of our Promoters, Gaji Mercantile Private Limited and Mr. Murarilal Mittal have given corporate and personal guarantees, respectively, in relation to certain debt facilities obtained by our Company from lenders. In event of default on the debt obligations, the corporate/personal guarantees may be invoked thereby adversely affecting our Promoters' ability to manage the affairs of our Company and consequently the impact our business, prospects, financial condition and results of operations.*

Our Company has availed of working capital facilities and term loan facilities from the Lenders of our Company. Our Promoters, Gaji Mercantile Private Limited and Mr. Murarilal Mittal have given corporate and personal guarantees, respectively, in relation to the debt facilities obtained by our Company. In event of default on the debt obligations, the guarantees may be invoked by our Lenders thereby adversely affecting our Promoters' ability to manage the affairs of our Company and this in turn may consequently impact our business, prospects, financial condition and results of operations. Further, in the event that any of these guarantees are revoked by our Promoters, our lenders may require alternate guarantees, repayment of amounts outstanding under the aforesaid facilities, or they may even terminate such facilities. We may not be able to procure other guarantees satisfactory to the Lenders, and as a result may need to repay outstanding amounts under such facilities or seek additional sources of capital, which could affect our financial condition and cash flows. For further details, please refer to the chapter titled "*Financial Indebtedness*" beginning on page 252 of this Prospectus.

17. *The interests of our Promoters or certain directors may conflict with our interests or with the best interests of our other shareholders. Any inappropriate resolution of such conflicts may adversely affect our business, results of operations and/ or the interests of our other shareholders.*

We are heavily dependent on our executive directors and their expertise for our strategic as well as day to day operations. The Managing Director/Promoter of our Company, Mr. Murarilal Mittal is involved in the management of other Group Companies promoted by him, including our Corporate Promoter– Gaji Mercantile Private Limited. Mr. Murarilal Mittal is a common director between our Company and our Corporate Promoter Gaji Mercantile Private Limited. He is also a common

BharatWire Ropes Limited

director between our Company and the companies promoting Gaji Mercantile Private Limited i.e. Gyanshankar Investment & Trading Company Private Limited and Stellar Credit and E-Trading Private Limited.

In case of a conflict between us and or any other entity in which our Directors or our Promoter Group members are interested, our Promoters/Directors may favor such other companies over us. Further, there may be situations in which they are unable to allocate sufficient time to our Company or effectively participate in the management of our Company, which could have a material adverse effect on our business. If any such actual, or perceived conflicts of interests are not resolved suitably, our business, results of operations and/or the interest of our other shareholders may be adversely affected. For further details, please refer to the chapters titled “Our Management” and “Our Promoters and Promoter Group”, “Our Group Companies/Entities” and “Related Party Transactions” beginning on pages 164, 183, 191 and 198, respectively of this Prospectus.

18. We are dependent on our Directors, senior management and Key Managerial Personnel of our Company for success whose loss could seriously impair our ability to continue to manage and expand our business efficiently.

The collective expertise of our Directors, senior management and Key Managerial Personnel enables us to make well informed decisions in relation to our business and our future prospects. For further details of our Directors and Key Managerial Personnel, please refer to chapter titled “Our Management” beginning on page 164 of this Prospectus. Our success largely depends on the continued services and performance of our management and other Key Managerial Personnel. The loss of service of our senior management could seriously impair our ability to continue to manage and expand the business efficiently. We cannot assure you that we will be able to retain our senior management and Key Managerial Personnel. Further, the loss of any of the senior management or other Key Managerial Personnel may adversely affect the operations, finances and profitability of our Company. Any failure or inability of our Company to efficiently retain and manage its human resources would adversely affect our ability to implement new projects and expand our business.

19. The total revenues and profit after tax of our Company have decreased in the past years.

The total revenues of our Company have decreased from Rs. 7,702.26 lacs in FY 2012 to Rs. 7,439.73 lacs in FY 2013, and from Rs. 8,229.48 lacs in FY 2014 to Rs. 7,672.21 lacs in FY 2015 and profit after tax have decreased from Rs. 214.08 lacs in FY 2012 to Rs. 147.54 lacs in FY 2013. Our financial condition will be adversely affected if such past downtrend occurs in the future.

20. Our Company does not have any similar and comparable listed peer which is involved in same line of business for comparison of performance and therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.

As of the date of this Prospectus, there are no comparable listed companies that are similar in size and nature and are involved in the same line of business, which are listed on the Indian stock exchanges and accordingly, we are not in a position to provide comparative analysis of our performance with any listed company. Therefore, investors must rely on their own examination of accounting ratios of our Company for the purposes of investment in the Issue.

21. Some of our Group Companies have incurred losses in the past years. Sustained losses by Group Companies could adversely affect our Promoters’ financial condition.

Some of our Group Companies have incurred losses in the recent past, as detailed below:

Sr. No.	Name of entity	Profit/ (Loss) after Tax (Rs. in lacs)		
		For the Financial Year ended		
		2015	2014	2013
1.	Gyanshankar Investment & Trading Company Private Limited	1.75	(89.21)	(53.79)

2.	Stellar Credit and E-Trading Private Limited	17.80	5.11	(15.60)
----	----------------------------------------------	-------	------	---------

There can be no assurance that these entities or any other ventures promoted by our Promoters will not incur losses in any future periods, or that there will not be any other adverse effect on our Promoters' financial condition.

22. Our Proposed Project is being part-funded from the IPO proceeds and any delay or deferment of the receipt of such proceeds may delay the implementation of the Proposed Project, increase our interest burden and may adversely affect our results of operations and financial condition.

In case shortfall of funds being raised by various means of finance resulting in difference between project cost on one hand and the term loan, IPO proceeds and fund already deployed, funds to be arranged through internal accruals/ net worth, our Company/its Promoters will have to arrange for alternate means of finance. In case there is any delay to arrange such alternate funds or delay in receipt of the IPO proceeds/bank financing, it may have a negative impact on the expansion plans of our Company and may delay the commencement/implementation of the Proposed Project. This may result in increase in our interest burden for the debt portion and adversely affect our results of operations and financial condition.

23. We have high working capital requirements. Our inability to meet our working capital requirements may have a material adverse effect on our business, financial condition and results of operations.

Our business requires a significant amount of working capital for smooth functioning. We meet our requirement for working capital majorly through banking facilities or internal accruals. In future, our inability, if any to meet our working capital requirements or inability to renew our existing working capital requirements through banking arrangements can adversely impact our business operations and financial position.

24. Post setting-up of the Proposed Project, our Company may be highly leveraged and downturn in the turnover may affect our ability for debt servicing.

As on January 31, 2016, our term loan stands at Rs. 7,113.96 lacs and buyers credit stands at Rs. 1,639.75 lacs, as certified by our Statutory Auditors vide certificate dated February 16, 2016. We are in the process of setting-up the Proposed Project at Chalisgaon, Maharashtra which is being funded through a mix of internal accruals, net worth of our Company, bank loans, ICDs and Net Issue Proceeds. Our long-term debt to equity ratio may increase in future. Our capacity to service these debts depends on our continued profitability and availability of liquid assets. Any adverse change in debt equity ratio may also affect our borrowing capacity. In case we are unable to achieve the desired growth, due to internal constraints or external factors like adverse developments in the industry, rising interest rate scenario, we may find it difficult to service the debt and this may affect our profitability and growth adversely.

25. The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.

Since the Issue size is less than Rs.50,000 lacs, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials. However, our Company will be required to report the utilization of the Issue Proceeds and the term loan availed from the Term Loan Consortium Lenders.

26. We have experienced negative cash flows in previous years.

We have experienced negative cash flows in previous years. Any operating losses or negative cash flows in the future could adversely affect our results of operations and financial conditions. The details of cash flows of our Company are as follows:

(Rs. in lacs)

Particulars	Period ended 30, November – 2015	Financial Year Ended March – 2015	Financial Year Ended March – 2014	Financial Year Ended March – 2013
Net cash (used in) / from Operating activities	790.14	1020.90	787.04	1,591.72
Net cash (used in) / from Investing activities	(8080.15)	(738.40)	(186.68)	(821.53)
Net cash (used in) / from Financing activities	7294.89	(287.28)	(1,254.59)	(1,187.79)
Net increase / (decrease) in cash and cash equivalents	4.89	(4.78)	(654.23)	(417.60)

Cash flow of a company is a significant indicator to demonstrate the extent of cash generated from the operations to meet capital expenditure, pay dividends, repay loans and to make new investments without raising finance from external resources. Any future operating losses or negative cash flows could adversely affect our results of operations and financial conditions. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

27. Our business is dependent on our continuing relationships with our customers, with whom we have not entered into long term arrangements. Part of our business comes from tenders and failure to procure such tenders on a continuous basis could adversely impact our revenues and profitability.

While in a few instances, we operate on a rate contract basis, we do not have long term arrangements with all of our customers for purchase of our products in the future, at fixed prices. Our Company also bids in the prospective tenders where bidders are scrutinized for technical and financial qualifications. The bids of qualified parties are then negotiated on the price offered for the respective works and the work is allotted to the party with lowest bid. There is no assurance that we will be able to obtain continuous business or that we will be able to replace our customer base in a timely manner or at all. The loss of, or interruption of work by, a significant customer or a number of significant customers or our inability to procure tender contracts on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations, including an interruption or partial or total work stoppage at our manufacturing facilities.

28. We have not entered into any agreement in respect of long term supply for raw materials required by us and as such we are susceptible to fluctuations in the cost of raw materials.

We are dependent on our suppliers for uninterrupted supply of raw-materials i.e. wire and wire rods. We procure our supply of raw materials from various suppliers depending upon the price and quality of raw materials. While we are not dependent on any one particular supplier for supply of raw materials, any disruption of such supply of raw materials from our suppliers will adversely affect our operations and ability to deliver our products on a timely basis. Further, our profitability is partly dependent on our ability to anticipate and adapt to changes in the cost of raw materials. Cost of the raw materials as a percentage of our total revenue from operations for financial year ended March 31, 2015 and for the period ended November 30, 2015 was 66.92 % and 67.38%, respectively. The prices of these raw materials are subject to price fluctuation due to various factors beyond our control, including but not limited to severe climatic conditions, governmental regulations, which may reduce supply and lead to increase in supply costs. In the event that we are unable to anticipate and adapt to changing supply costs by adjusting our purchasing practices or we are unable to negotiate favourable pricing terms with our suppliers for such raw materials, then our business, profitability and financial performance may be materially and adversely affected. Further, any disruption in the adequate and timely supply of raw materials or unavailability of raw materials may adversely affect our business and results of operations.

29. Our Lenders have charge over our movable and immovable properties in respect of financial facilities availed by us.

We have secured our lenders by creating charge over our movable and immovable properties. In the event of our default in repayment of the financial facilities availed by us and any interest thereon, our Lenders may enforce their claims. For further information on the financing and loan agreements along with the total amounts outstanding, please refer to the chapter titled “*Financial Indebtedness*” beginning on page 252 of this Prospectus.

30. *Delays or defaults in customer payments could result in a reduction of our profits and cash flows.*

We often commit resources to orders prior to receiving advances or other payments from customers in amounts sufficient to cover expenditures on orders as they are incurred. If the customers delay or default in making payments on an order, or cancel their orders for which we have devoted significant resources or incurred expenditure, it could have a material adverse effect on our business, financial condition, results of operations and cash flows. We may also be subject to working capital shortages due to delays in customer payments. These events could have a material adverse effect on our revenues, results of operations, profitability and cash flows.

31. *Our products are subject to rejection by our customers if they do not meet the quality and technical requirements of our customers.*

We manufacture products on the basis of the specifications provided by our customers and such products are customized for their requirements. Some of our customers conduct quality testing of our products after receiving delivery of the products. In the event our products do not meet the specifications of our customers including the technical or quality parameters required by the customers, then our customers may reject the products. There can be no assurance that we will be able to procure alternate customers for our products and at a favourable price. Any substantial rejection of our products and/or our inability to procure other customers for our products will adversely affect our financial position.

32. *Our indebtedness and the conditions and restrictions imposed by our financing and other agreements could adversely affect our ability to conduct our business and operations.*

We have currently availed credit facilities from various banks. We have entered into agreements for working capital loan, term loan and financial facilities with our lenders and the covenants in borrowings from bank/ lenders, among other things require us to obtain permissions in writing in respect of, including, but not limited to effecting any change in the management/Board of our Company, change in capital structure of our Company; undertake any new expansion/modernization/diversification scheme except which are approved by Bank/ lenders, formulate any scheme of amalgamation, acquisition, merger, or reconstruction/declare dividends etc. These covenants may have an adverse effect on the functioning of our Company. Further, if we fail to meet our debt service obligations with respect to the secured term loans/other borrowings availed by us or fail to procure any waiver of breaches that may be committed by us vis-à-vis the financing documents, then the same may result in the relevant lenders declaring us in default under the terms of our borrowings or accelerating the maturity of our obligations, which in turn could have an adverse effect on our cash flows, business and results of operations and we may be exposed to refinancing risk. For further details on restrictive and financial covenants, please refer to the chapter titled “*Financial Indebtedness*” beginning on page 252 of this Prospectus.

33. *We have entered into and may continue to enter into related party transactions in the future. As per our Restated Financial Statements, for the financial year ended March 31, 2015 and the period ended November 30, 2015, the aggregate of such transactions was Rs. 130.82 lacs, and Rs.1769.80 lacs respectively. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our Company’s financial condition and results of operations.*

Our Company has entered into certain related party transactions with its Promoter/Promoter Group/Group Entities/ Directors/ Key Managerial Personnel. Our Promoters, Directors and Key Managerial Personnel may be deemed to be interested in our Company to the extent of the Equity Shares held by them, or their relatives, benefits deriving from their directorship in our Company and arising from transactions entered into between our Company and themselves as well as between our Company and our Group Entities. While we believe that all such transactions have been conducted on an arms-length basis, there can be no assurance that our Company could not have achieved more favorable terms had such transactions not be entered into with related parties. Furthermore, it is likely that our Company will enter into related party

transactions in the future. For further details, please refer to the chapter titled “*Related Party Transactions*” beginning on page 198 of this Prospectus.

34. *The unexpected loss, shutdown or slowdown of operations at our Company’s manufacturing facilities could have a material adverse effect on our Company’s results of operations and financial condition.*

Our Company’s manufacturing facilities are subject to operating risks, such as the breakdown or failure of equipment, power supply interruptions, facility obsolescence or disrepair, labour disputes, natural disasters and industrial accidents. The occurrence of any of these risks could affect our Company’s operations by causing production at one or more facilities to shutdown or slowdown. No assurance can be given that one or more of the factors mentioned above will not occur, which could have a material adverse effect on our Company’s results of operations and financial condition. In addition, our Company’s manufacturing processes depend on critical pieces of equipment. Such equipment may, on occasion, be out of service as a result of unanticipated failures, which could require our Company to close part or all of the relevant production facility or cause our Company to reduce production on one or more of its production lines. Any interruption in production capability may require our Company to make significant and unanticipated capital expenditures to affect repairs, which could have a negative effect on our Company’s profitability and cash flows. Any or all of these occurrences could have material adverse effect on our Company’s business, results of operations, financial condition and prospects.

35. *As on November 30, 2015, our contingent liabilities not provided for aggregated to Rs.334.13 lacs. In the event that such liabilities materialise, our financial condition may be adversely affected.*

As on November 30, 2015 contingent liabilities not provided for appearing in our financial statements, as restated aggregated to Rs. 334.13 lacs and the following table gives the details of such contingent liabilities:

Particulars	Amount (Rs. in lacs)
Performance Guarantees/Bid Bond given by banks to Company’s customers / Government authorities etc.	223.05
Disputed Income Tax	80.65
Disputed Central Excise and Service Tax	30.44
Total	334.13

If any or all of these contingent liabilities materialize, it could have a material adverse effect on our business, financial condition and results of operations. Further, our Company has also opened letter of credit, for the, Proposed Project, amounting to Rs. 3862.98 lacs as on January 31, 2016, as certified by M/s Sureka Associated vide certificate dated February 16, 2016. For further information on such contingent liabilities, please refer to the Section titled “*Financial Information*” beginning on page 200 of this Prospectus.

36. *Our business prospects and continued growth depends on our ability to access financing at competitive rates and competitive terms, which amongst other factors is dependent on our credit rating. We may not be able to avail the requisite amount of financing or obtain financing at competitive interest rates for our growth plans and cannot assure that we will obtain the desired credit ratings of our Company, in the future, which could have a material adverse effect on our business, results of operations and financial condition.*

Our business depends on our ability to obtain funds at competitive rates. The cost and availability of capital, amongst other factors, is also dependent on our current and future results of operations and financial condition, our ability to effectively manage risks, our brand and our credit ratings. We may not be able to avail the requisite amount of financing or obtain financing at competitive interest rates if we fail to have favourable results of operations. While ratings reflect a rating agency’s opinion of a company’s financial strength, operating performance, strategic position, and ability to meet its obligations, currently, we have not obtained any credit ratings. Such absence of credit ratings could lead to high borrowing costs and limit our access to capital and lending markets and, as a result, could adversely affect our business.

37. *Post this Issue, our Promoters and Promoter Group will continue to hold majority shares in our Company.*

Post this Issue, our Promoters and Promoter Group will continue to hold 57.12% of the post-issue Equity Share capital of our Company, and will therefore continue to have control over our business including matters relating to any sale of all or substantially all of our assets, the timing and distribution of dividends and the election, termination or appointment of our officers and directors. This control could delay, defer, or prevent a change in control in our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage potential acquirers from making an offer or otherwise attempting to obtain control over our Company even if it is in its best interest. Our Promoters and Promoter Group may also influence our material policies in a manner that could conflict with the interests of our other shareholders.

38. *Our liabilities may not be fully covered by insurance policies, which may expose us to substantial costs that could adversely affect our business, financial condition and results of operations.*

Our Company has insured itself against certain eventualities including against burglary, fire and special perils. While we have taken adequate and appropriate insurance coverage to take care of certain contingencies, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully or in part or will be paid on time. Mishaps or accidents at our Company's facilities may lead to property damages, property loss and accident claims. We cannot assure that we have taken out sufficient insurance to cover such and other material losses thereby adversely affecting our performance. To the extent that we suffer loss or damage for which we have not obtained or maintained insurance or which is not covered by insurance or exceeds our insurance coverage, the loss would have to be borne by us and thus our results of operations and financial performance could be adversely affected.

39. *Product liability claims could adversely affect our Company's operations.*

Our Company sells products to manufacturers who are engaged to sell a wide range of end products. Furthermore, our Company's products are also sold to, and used in, certain safety-critical applications. If our Company were to sell wire ropes that do not meet specifications or the requirements of the application, significant disruptions could occur to the production lines of our customers. There could also be significant consequential damages resulting from the use of such products. Our Company has not obtained product liability insurance coverage and a major claim for damages related to products sold could leave our Company uninsured against a portion or all of the costs, which may materially harm its financial condition and future operating results.

40. *We rely on contractors for the implementation of various aspects of our business, and are therefore, exposed to execution risks, including in relation to the timing or quality of their services, equipment or supplies.*

We rely on the availability of skilled/ experienced contractors for the implementation of our plans, managing the unskilled and semi-skilled labour at our sites, and on-going operation of various aspects of our business. We enter into arrangements with contractors for recruitment of labour as per requirements for a fixed period of time. There is no assurance that we may be able to renew these arrangements on a timely basis or at all. We do not have direct control over the timing or quality of the services and supplies provided by such third parties. Third party contracts expose us to various risks, including credit risk, settlement risk, operational risk, legal risk and reputation risk. The execution risks we face include the following:

- contractors which will be hired by us for the supply of construction/erection equipment in the Proposed Project at Chalisgaon, may not be able to install or assemble the machines purchased on time, or adhere to the construction timelines for Proposed Project or abide by the budgeted costs or the agreed specifications and standards;
- contractors hired by us may be unable to provide the requisite manpower on timely basis or at all or may be subjected to disputes with their personnel which in turn may affect our production schedule and timely delivery of our products to our customers;
- delay in the delivery of equipment, meeting project milestones or achieving commissioning by the scheduled completion date may increase the financing costs associated therewith and cause our budgets to be exceeded or result in delayed payment to us by customers, invoke liquidated damages or penalty clauses, or result in termination of orders placed;

BharatWire Ropes Limited

- we may have to use contractors with whom we are not familiar, which may increase the risk of cost overruns or lower or no return on capital, construction defects and failures to meet scheduled completion dates; and
- our regular labour contractors may engage contract labourers and although we do not engage such labourers directly, we may be held responsible under applicable Indian laws for wage payments to such labourers should our contractors default on wage payments.

41. Strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees could adversely affect our business and results of operations.

Our Company is exposed to strikes and other industrial actions. There are two trade unions of our workmen. In the past, our Company has experienced disputes with our workers, including a strike, which was resolved by entering into a Memorandum of Settlement dated April 16, 2012, with one of the trade union of our workmen. This Memorandum of Settlement was valid till November 30, 2014 and no formal or informal understanding/settlement has been arrived at with the Trade Union of our workmen. Our Company had entered into a Memorandum of Settlement with the other trade union as well which was valid till March 31, 2015. As per the terms of such settlement the same is continuing till fresh terms are agreed by our Company with said trade unions.

As on January 31, 2016, our Company has 288 full-time employees including workers at our Existing Manufacturing Facility. While presently we enjoy a good relationship with our employees, there can be no assurance that the trade unions of our workmen may not make any further demands. There can be no assurance that we may not experience disruptions in our operations due to disputes or other problems with our work force such as strikes, work stoppages or increased wage demands that may adversely affect our business and results of operations.

42. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

43. Failure to maintain adequate health and safety standards may cause our Company to incur significant costs and liabilities and may damage our Company's reputation.

Our Company is subject to a broad range of health and safety laws and regulations in the jurisdiction in which it operates. These laws and regulations, as interpreted by the relevant agencies and the courts, impose increasingly stringent health and safety protection standards. The costs of complying with, and the imposition of liabilities pursuant to, health and safety laws and regulations could be significant, and failure to comply could result in the assessment of civil and/or criminal penalties, the suspension of permits or operations and lawsuits by third parties. Despite our Company's efforts to monitor and reduce accidents at its facilities, there remains a risk that health and safety incidents may occur. Such incidents could include explosions or gas leaks, fires or other incidents involving exposure to potentially hazardous materials. Some of our Company's manufacturing activities involve the use, storage and transport of dangerous chemicals and toxic substances, and our Company is therefore subject to the risk of industrial accidents which could have significant adverse consequences for our Company's workers and facilities, as well as the environment. Such incidents could lead to production stoppages, the loss of key assets, or put at risk employees (including those of sub-contractors and suppliers) or persons living near the affected site. In addition, such incidents could damage our Company's reputation, leading to the rejection of products by customers. These events could have a material adverse effect on our revenues, results of operations, profitability and cash flows and diversion of management time into rebuilding and restoring its reputation.

44. We are subject to risk of fraud, theft, embezzlement by our employees, contractors and customers, employee negligence or similar incidents may adversely affect our results of operations and financial condition.

As of November 30, 2015 we had total inventory consisting of raw materials, stock in process and finished goods to the value of Rs. 3525.04 lacs as per our Restated Financial Statements. Our operations may be subject to incidents of theft or damage to inventory in transit, prior to or during stocking. We may also encounter some inventory loss on account of employee/contractor/vendor fraud, theft, embezzlement and general administrative error. Although, we have set up various security measures, including tagging our products, CCTV in our offices and the Existing Manufacturing Facility at Atgaon, deployment of security guards and follow stringent operational processes such as periodic stock taking there can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition.

45. We face competition in our businesses, which may limit our growth and prospects.

Our Company faces competition in the industry that we are involved in. In particular, we compete with other wire rope manufacturing companies, both in India and abroad. We compete on the basis of a number of factors, including execution, depth of product and service offerings, innovation, reputation and price. Our competitors may have advantages over us, including, but not limited to:

- Substantially greater financial resources;
- Greater brand recognition among consumers;
- Larger customer bases in and outside India;
- More diversified operations which allow profits from certain operations to support others with lower profitability; or
- More experience and expertise.

These competitive pressures may affect our business, and our growth will largely depend on our ability to respond in an effective and timely manner to these competitive pressures.

46. We have not declared dividend on Equity Shares in the last five years and there can be no assurance that we will declare any dividends in future. Our ability to pay dividends in the future may be affected by the restrictive covenants contained in our financing documents.

We have not declared dividend on Equity Shares in last 5 (five) years. The amount of dividend payments in future, if any, will depend upon several factors including our future earnings, financial condition, cash flows, working capital requirements, capital expenditures etc. Our financing documents restrict us from declaring dividends without the obtaining the prior consent of our Lenders. Our ability to declare dividends in future will also depend upon our earnings, capital requirements and financial condition. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. There can be no assurance that we will pay dividends in future.

47. Increased competition for skilled employees and salary increases for our employees may reduce our profit margin.

Due to sustained economic growth in India and increased competition for skilled employees in India over the last few years, wages of skilled employees are increasing at a fast rate. Accordingly, we may need to increase our levels of employee compensation rapidly to remain competitive in attracting the quality of employees that our business requires. Salary increases may reduce our profit margins and have a material and adverse effect on our results of operations.

48. The wire rope industry is capital intensive in nature and factors affecting the demand for the products manufactured by us could affect our results of our operations.

Since we operate in a capital intensive industry, our operations involve a high level of fixed cost. If our sales volumes decline, then we may experience a sharp decrease in the profits earned as our fixed cost component cannot be removed or reduced. This may result in an adverse effect on our financial condition, cash-flows and business operations.

49. Any increase in interest rates would have an adverse effect on our results of operations and will expose our Company to interest rate risks.

We are dependent upon the availability of equity, cash balances and debt financing to fund our operations and growth. Our secured debt has been availed at floating rates of interest. Any fluctuations in interest rates may directly impact the interest costs of such loans and, in particular, any increase in interest rates could adversely affect our results of operations. Furthermore, our indebtedness means that a material portion of our expected cash flow may be required to be dedicated to the payment of interest on our indebtedness, thereby reducing the funds available to us for use in our general business operations. If interest rates increase, our interest payments will increase and our ability to obtain additional debt and non-fund based facilities could be adversely affected with a concurrent adverse effect on our business, financial condition and results of operations. For further details, please refer chapter titled '*Financial Indebtedness*' beginning on page 252 of this Prospectus.

50. There may be changes in the estimated project cost.

Currently, we have placed orders for 92.15% of the plant and machinery required to be utilized in the Proposed Project and the total cost of the plant and machinery required by us is estimated to be Rs. 35,752.49 lacs. We may have to revise our expenditure and fund requirements as a result of variations in cost estimates on account of variety of factors such as changes in our financial condition, business or strategy, change in quotation for machinery, revision in purchase orders as well as external factors which may not be in our control and may entail rescheduling and revising the planned expenditure and funding requirement and increasing or decreasing the expenditure for a particular purpose from the planned expenditure at the discretion of our management.

51. We have referred to the data derived from industry report commissioned from the Credit Analysis and Research Limited.

We have retained the services of an independent third party research agency, Credit Analysis and Research Limited, Mumbai, to prepare a report on the wire rope industry, excerpts from which have been included in this Prospectus. The report prepared by CARE is subject to various limitations and based upon certain assumptions that are subjective in nature. There can be no assurance that the assumptions adopted by this third party agency for the purposes of preparing their research report will prove to be accurate. If any of these assumptions are incorrect, the understanding of the wire rope industry could be materially different from that set forth in the reports.

52. Data relating to demand and supply for domestic and international markets for our products is not available.

Our Company's business involves production of wire ropes, structural strands, slings and wires which has application in oil and exploration, mining, shipping, construction, elevator, railways, ports and marine sectors, etc. Our Company relies on its management's estimation of the demand for its products. Since no independent data forecasting the demand in the sectors in which we operate is available readily to us, we may not be able to fully exploit the thriving markets for our products. Further, we are heavily dependent upon the growth prospects of the industries which consume our products. Any incorrect estimation of the rate of growth of these industries or their preferences as regards the quality and type of wire ropes required would have an adverse impact on our growth prospects and may result in decline of profits.

53. We have entered into transactions in foreign currency for purchasing certain plant and machineries for our Proposed Project. These transactions are subject to risks arising from foreign exchange rate fluctuations, which could adversely affect our financial condition.

Part of the equipments/machinery to be utilized in our Proposed Project is proposed to be imported. Since the cost of plant and machinery are denominated in foreign currency, any adverse fluctuations in the exchange rate of foreign currency vis-a-vis Indian Rupee could adversely affect our financial condition and operations. We may consider hedging our risks against foreign exchange rate fluctuation.

54. Our Company does not currently own the premises at which its corporate office and its warehouse are located.

Our Company does not own the premises where its corporate office at Mumbai and our warehouse at Bangalore are located. The leave and license agreement of our corporate office expires on March 31, 2017 and the lease agreement for our warehouse has expired on March 31, 2015 though our Company continues to occupy the warehouse and pay rent thereon. In the event that our Company is unable to renew the leave and license and/or the lease agreements and is required to vacate the premises on which its office and warehouse are situated, it shall be required to make alternative arrangements for premises and other infrastructure at short notice. There is no assurance that our Company will be able to renew these agreements on favourable pricing terms or at all. Termination/non-renewal of any of the aforesaid agreements may lead to disruptions in our operations. For further details, please refer to the chapter titled “*Our Business*” beginning on page 121 of this Prospectus.

55. *Our Company is in the process of acquiring land bearing Plot No. R-1 in Chalisgaon Industrial Area, within the village limits of Chalisgaon, District Shahpur. However, no lease has been executed for the same.*

Our Company had filed an application dated December 22, 2015 with MIDC in order to acquire the plot bearing no. R-1 in Chalisgaon Industrial Area, within the village limits of Chalisgaon, District Shahpur, on a lease basis and has paid Rs. 6.25 lacs towards earnest money, for the same. Vide order dated January 19, 2016, MIDC has accorded allotment of the said land, for residential purposes, subject to the fulfillment of certain terms and conditions inter alia being that our Company must make payment of Rs. 22.50 lacs towards premium amount, in respect of the said land, within a period of 30 (thirty) days of the said order, and that our Company must enter into an Agreement to Lease, in respect of the said land within a period of 30 (thirty) days from the date of receipt of payment of the premium amount by MIDC. In the event, the Company fails to fulfill the aforesaid stipulations within the prescribed time period, then we may fail to obtain possession of the said land. There is no assurance that our Company will be able to procure alternate sites at favourable pricing terms. In addition, we may not always have the ability to access, analyse and verify all information regarding titles and other issues prior to entering into lease arrangements in respect of an additional site.

56. *The erstwhile promoters of our Company i.e., Mr. Devchand Mulji Shah, Mr. Dinesh Sunderji Shah and Mr. Sunderji Mulji Shah, had been prohibited by SEBI through its order dated December 28, 2011 from dealing in the securities market for a period of nine months and the aforesaid order may result in an adverse material impact on our goodwill, and reputation.*

Mr. Devchand Mulji Shah, Mr. Dinesh Sunderji Shah and Mr. Sunderji Mulji Shah, and certain other members of the Shah Group were the promoters of our Company until June 30, 2010. SEBI, through its order dated December 28, 2011, bearing No. WTM/PS/IVD-ID5/42/2011/DEC (“**Interim Order**”), issued against Mr. Devchand Mulji Shah, Mr. Dinesh Sunderji Shah, Mr. Sunderji Mulji Shah (“**the Erstwhile Promoters**”) and certain other entities, in the matter of initial public offering of PG Electroplast Limited, inter alia prohibited the Erstwhile Promoters from buying, selling or dealing in the securities market, in any manner whatsoever, till further directions, effective from December 28, 2011. Thereafter, SEBI issued another order October 31, 2012, bearing No. WTM/PS/16/IVD/ID-5/OCT/2012 (“**Revocation Order**”) against the Erstwhile Promoters and certain other entities inter alia vacating the directions issued under the Interim Order. There are presently no orders from SEBI or any regulatory authority which prohibit the Erstwhile Promoters from buying, selling or otherwise dealing in the securities market, in relation to the aforesaid matter or any other matter. However, the aforesaid orders against the Erstwhile Promoters of our Company, may result in an adverse material impact on our goodwill, and reputation.

57. *We are required to meet our export obligations pursuant to the Government of India’s Export Promotion Capital Goods Scheme, failing which, our Company may be liable to pay custom duty along with the applicable interest/penalty leviable on the same and this might have a material adverse effect on our financial condition and our results of operations.*

We have imported some of our equipment under licenses pursuant to the Government of India’s Export Promotion Capital Goods (EPCG) scheme. Our export obligation, as on January 31, 2016, amounts to Rs. 4412.02 lacs, which is required to be met within the next 6 (six) years, failing which our Company may be liable to pay custom duty along with the applicable interest/penalty leviable on the same and this might have a material adverse effect on our results of operations and our business and financial performance will be adversely affected.

58. *The LIE Report envisages certain threats and concerns, in respect of the Proposed Project, which might effect our profitability and results of operations.*

The concerns and threats provided for in the LIE Report have been enumerated below:

- i. We may be required to keep pace with the rapidly changing technological environment, which will require us to increase our investment in superior technology in order to compete efficiently, reduce our competitiveness, and increase our ability to develop new products and the consequential quality of our products.
- ii. The schedule of implementation of the Proposed Project has undergone a change because of delay in title clearance of a part of the land taken on lease from MIDC and availability of power supply. As a result, the commercial production date, as envisaged, has been revised and further extended by a period of 12 (twelve) months..
- iii. Our Company faces competition in the industry that we are involved in. In particular, we compete with other wire rope manufacturing companies, both in India and abroad. We compete on the basis of a number of factors, including but not limited to quality, time of delivery and price.
- iv. Fluctuations in the price, availability and quality of raw materials used in our manufacturing process, could have a material adverse effect on cost of sales or our ability to meet customer demands. There can be no assurance that we will always be successful in our efforts to protect our business from the volatility of the market price of raw materials, and our business can be affected by dramatic movements in prices of raw materials.
- iv. We expect competition in our business and pricing terms to increase and such competitive pressures could also lead to increases in expenses such as advertising and sales promotion and marketing expenses,. Further, we may be required to undertake effective marketing initiatives to deepen the presence of our brand and differentiate it from competition.

B. *EXTERNAL RISK FACTORS*

59. *The recurrence of systemic events such as the recent global economic meltdown, instability of economic policies and the political situation in India or globally may adversely affect our performance.*

Economic conditions outside India, may adversely impact the growth of the Indian economy, and Government policy may change in response to such conditions. Unstable internal and international political environment may impact the economic performance of the wire rope industry, including our Company, in the short and long term. Our business, and the market price and liquidity of our Equity Shares, may be affected by reactionary changes in interest rates, changes in government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India on account of any changes in the global economic changes.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries. Financial turmoil in Asia, the United States, Europe and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investor's reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. The Indian financial markets experienced the contagion effect of the volatility and turmoil in the global financial markets, which was evident from the sharp decline in the benchmark indices of SENSEX and NIFTY from their peak levels in early 2008 to the first quarter of 2009. As a consequence of the severe tightening of credit associated with that financial turmoil, many economies experienced periods of severe recession accompanied by a significant deterioration of consumer confidence and demand. Additionally, due to the conditions in the global and domestic financial markets, we cannot be certain that we would be able to raise capital, if needed or to the extent required, or that we will be able to undertake our business without any disruptions and we may be unable to implement our growth strategy. Any recurrence of such events may have an adverse effect on our business, financial condition and results of operations as well as the price of our Equity Shares.

60. *The occurrence of natural disasters may adversely affect our business, financial condition and results of operations.*

India has experienced natural calamities such as earthquakes, tsunamis, floods and drought in the past few years. The extent and severity of these natural disasters determine their impact on the Indian economy. This may adversely affect our business operations and financial position of our Company.

61. Political instability or changes in the Government may delay the liberalisation of the Indian economy and adversely affect economic conditions in India generally, which may impact our business, financial condition and results of operations.

The role of the central and state governments in the Indian economy has remained significant over the years. Since 1991, the Government of India has pursued policies of economic liberalization, including significantly relaxing restrictions on the private sector. There can be no assurance that these liberalization policies will continue in the future. The rate of economic liberalization could change, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in Indian companies could change as well. A significant change in India's economic liberalization and deregulation policies could disrupt business and economic conditions in India, thereby affect our business.

62. A slowdown in economic growth in India could cause our business to suffer.

A host of economic factors like increase in rate of inflation, scarcity of credit, increases in commodity and energy prices may impede our growth and expansion plans and may even affect the successful implementation of our current projects. Further, other factors such as political or regulatory action, including adverse changes in liberalization policies, business corruption, social disturbances, terrorist attacks and other acts of violence or war, natural calamities, may also affect the business of our Company. Our results of operations and financial condition are dependent on, and may be adversely affected by, conditions in financial markets in the global economy and, particularly in India. Since our Company primarily conducts its business within the boundaries of India and all of its assets and majority of its employees are located in India, we are highly dependent on the prevailing market conditions in terms of our performance which is affected by the existing economic conditions. Any slowdown in the Indian economy may adversely affect our business, financial condition, results of operations and the price of our Equity Shares.

63. Changes in technology may render our current technologies obsolete or require us to undertake substantial capital investments, which could adversely affect our results of operations.

We may not be able to keep pace with the rapidly changing technological environment. Any such failure on our part could adversely affect our ability to compete efficiently, reduce our competitiveness, ability to develop new products and the consequential quality of our products, and could also adversely affect our sales and profitability.

Our success will depend in part on our ability to anticipate and respond on a timely basis and economical basis to technological advances in the sector in which we operate. The introduction, development and implementation of such newer technologies in our manufacturing process especially involves technical and business risks. Further, our ability to provide for commensurate capital expenditure will also govern our ability to adopt new technology to provide for better and improved products. There can be no assurance that we will be able to adapt or upgrade our existing technologies and successfully implement new technologies at all times. Further, the information available to our management may not be timely and sufficient to respond to changes in market conditions and other developments in our area of operation. If we are unable, for any reasons, to adapt in a timely manner to changing market conditions, customer requirements, technological changes or make provision for the required capital expenditure to adapt these technological changes, it may adversely affect our business, results of operations and financial condition.

64. Allegations of corruption, civil unrest, acts of violence include terrorism, war, communal disturbances, riots or regional hostilities involving India or other countries could materially and adversely affect our business, results of operations and financial condition.

Recent allegations of corruption in India have the potential to discourage investors and derail the growth prospects of the Indian economy. Continued allegations of corruption may create economic and regulatory uncertainty and could have an adverse effect on our business, profitability and results of operations. The Asian region has from time to time experienced instances of civil unrest and hostilities among neighbouring countries. Although the governments of India and neighbouring

countries have recently been engaged in conciliatory efforts, any deterioration in relations between India and neighbouring countries might result in investor concern about stability in the region.

Hostilities and tensions may occur in the future and on a wider scale. Military activity or terrorist attacks in India as well as other acts of violence or war, could influence the Indian economy by creating a perception that investments in India involve higher degrees of risk. These acts may also result in a loss of business confidence, make travel and other services more difficult and ultimately materially and adversely affect our business. India has experienced communal disturbances, terrorist attacks and riots during recent years and prolonged strikes. Events such as these may depress the housing prices, decrease the demand for housing and impacts income which increases default on housing loans. If such events recur, our operational and marketing activities may be adversely affected, resulting in a decline in our income. If any of our offices are directly affected by any such terrorist attack or riot, our operations may be disrupted which will adversely affect our business and results of operation.

Corruption, civil unrest, acts of violence including terrorism, war, communal disturbances, riots or regional hostilities involving India or other countries could materially and adversely affect our business, results of operations and financial condition. These factors could lead to political or economic instability in India and may have a material adverse effect on our business, results of operations and financial condition.

65. Inflation in India could have a material adverse effect on our profitability, our business, results of operations and financial condition.

In the recent past, India has experienced fluctuating wholesale price inflation as compared to historical levels due to the global economic downturn. An increase in inflation in India could cause a rise in the price of raw materials and wages, or any other expenses that we incur. If this trend continues, we may be unable to accurately estimate or control our costs of production and this could have an adverse effect on our business and results of operations.

66. Significant differences exist between Indian GAAP and other accounting principles, such as IFRS, which may be material to investors' assessment of our financial condition and results of operations.

Our failure to successfully convert to IND AS within the prescribed time framework could have an adverse effect on our stock price. Our financial statements, including the financial statements provided in this Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Indian GAAP. Accordingly, the degree to which the Indian GAAP financial statements included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited.

Risks relating to the Issue and Equity Shares

67. Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.

The Companies Act, 1956, Companies Act, 2013 (to the extent notified and applicable) and related rules, articles of association of our Company and the Listing Agreement govern the corporate affairs of our Company. Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder than as a shareholder of a corporation in another jurisdiction.

68. Our Company cannot warrant that its securities will continue to be listed on the Stock Exchanges.

Pursuant to the listing of our Company's securities on the Stock Exchanges, our Company shall be required to comply with certain regulations and/or guidelines as prescribed by SEBI and the Stock Exchanges. However, in the event that our Company fails to comply with any of the aforesaid regulations and/or guidelines, our Company cannot assure that its securities will continue to be listed on the Stock Exchanges.

69. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Capital gains arising from the sale of the equity shares of our Company are generally taxable in India. Any gain realized on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if the STT has been paid on the transaction. The STT will be levied on and collected by an Indian stock exchange on which equity shares are transacted. Any gain realized on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and as a result of which no STT has been paid, will be subject to capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to capital gains tax in India. Capital gains arising from the sale of the equity shares of our Company will be exempt from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident.

Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gain upon a sale of the Equity Shares.

70. *Foreign investors are subject to foreign investment restrictions under Indian law that limit our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required.

Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require certain approvals. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

71. *Our ability to raise foreign capital may be constrained by Indian law. The limitations on foreign debt may have a material adverse effect on our business, financial condition and results of operations and the price of our Equity Shares.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financings on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. The limitations on foreign debt may have an adverse effect on our business, financial condition and results of operations and the price of our Equity Shares.

72. *Volatility in the stock market may have an impact on the market price and trading of our Equity Shares.*

Stock markets have experienced extreme volatility that has often been unrelated to the operating performance of particular companies. These broad market fluctuations may adversely affect the trading price of our Equity Shares. There may be significant volatility in the market price of our Equity Shares.

If we are unable to operate profitably or as profitably as we have in the past, investors could sell our Equity Shares when it becomes apparent that the expectations of the market may not be realized, resulting in a decrease in the market price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

73. *Our Company and investors resident outside India are subject to foreign investment restrictions under Indian law which may adversely affect our Company's operations and their ability to freely sell the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of equity shares from non-residents to residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of equity shares is not in compliance with such pricing guidelines or reporting

BharatWire Ropes Limited

requirements or fall under any of the specified exceptions, then the prior approval of the RBI will be required. In addition, shareholders who seek to convert the Rupee proceeds from a sale of equity shares in India into foreign currency and repatriate that foreign currency from India will require a no-objection or a tax clearance certificate from the income tax authority. Our Company cannot assure investors that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all. Our Company may also be subject to restrictions relating to investment under the foreign direct investment policy of the Governments. Pursuant to the Consolidated FDI Policy Circular of 2015 with effect from May 12, 2015, foreign investment limit is allowed up to 100 per cent under automatic route in our Company, subject to appropriate approvals of the shareholders in general meeting. Currently, the foreign institutional investment (including investment by SEBI approved sub-accounts of FIIs) in our Company is limited to 24 per cent of the paid up equity share capital of our Company and investment by NRIs is limited upto 10% of the paid up equity capital of our Company, as we have not obtained the approvals of shareholders for a higher limit.

74. Any future issuance of equity shares by us may dilute your shareholding and adversely affect the trading price of our Equity Shares.

Any future issuance of equity shares by us including in primary offering or pursuant to a preferential allotment may dilute your shareholding in our Company, adversely affect the trading price of our equity shares and could impact our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Additionally, the disposal of Equity Shares by any of our major shareholders, any future issuance of equity shares by us or the perception that such issuance or sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that we will not issue equity shares or that such shareholders will not dispose of, pledge or encumber their equity shares in the future.

75. Any downgrading of India's debt rating by a domestic or international rating agency could negatively impact our business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our financial results and business prospects, ability to obtain financing for capital expenditures and the price of our Equity Shares.

76. Our Company's Equity Shares have never been publicly traded and the Issue may not result in an active or liquid market for our Equity Shares. Further, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Issue Price, or at all.

Prior to the Issue, there has been no public market for our Company's Equity Shares. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after the Issue. The Issue Price of the Equity Shares is proposed to be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions specific to the industry we operate in, developments relating to India and volatility in the securities markets elsewhere in the world.

Overview

While China continues to remain as the world’s top producer of steel followed by the USA and Japan, the Indian steel industry remained the world’s fourth-largest steel producer for the fifth year in a row in CY14. With not much gap in production, India is closing in on USA and is expected to surpass it soon with the ongoing expansions by the steel players in India. Production in India has been on a rise with a CAGR of 8.4% from FY10-FY15. India has set ambitious targets to go up from the present installed capacity of about 101 mtpa to as high as 300 mtpa by 2025. The per capita consumption of steel in India also continued to remain low as compared to other countries, indicating further potential growth of the domestic steel industry. The average per capita use of steel in India in 2014 was about 59 kg compared to the world average of 225 kg, so the domestic steel industry’s long-term prospects remain intact.

In the medium term as well, the leading steel producers in India have lined up plans to increase their steel capacity in line with the expected increase in the domestic consumption of steel. However, CARE Research believes, with the current pace of expansion, the Indian steel industry over the next 3-4 years is only likely to add another 15 million tonnes of capacity, taking the domestic steel capacity at around 115 mn tonnes by FY18.

Wire ropes are a value-added product, formed from wire rods, which falls in the long steel category of steel products. Over the years, with significant improvement in the strength of wire ropes manufactured, the usage of these wire ropes has significantly increased in various diverse applications.

DOMESTIC OUTLOOK

Domestic demand outlook

Registering a CAGR of about 8%, India has more than doubled its finished steel consumption from about 30 million tonnes in FY03 to 76 million tonnes in FY15. During the same period, finished steel production grew at a marginally slower pace as compared to the growth in demand, growing at a CAGR of about 7.7%. While the domestic steel industry has recorded a robust growth in the past, the current situation has seen a dramatic shift. In comparison to the steel demand CAGR of about 7.5% achieved during the period FY10-13, domestic steel demand grew at a modest CAGR of about 2% during FY 13-15.

BharatWire Ropes Limited

Nevertheless, the situation in the domestic market is akin to the global steel industry, which continues to remain highly volatile.

Although the domestic demand in FY15 increased at a higher growth rate of about 3%, when compared with the growth achieved during FY14 (0.83%), the demand growth in the domestic market continues to remain far lower than the growth achieved during the previous years. The slower growth achieved in demand was primarily on account of policy paralysis, which had its toll on the infrastructural activities in the domestic markets. Elevated inflationary and interest rate pressure for a prolonged period further had its impact on the automobile and the consumer durables industry, thereby affecting the steel off-take from these sectors.

Going ahead, CARE Research expects the domestic steel demand to grow at a CAGR of about 6.3% during the next three years (FY15 to FY18). Domestic demand is likely to grow from about 76 million tonnes in FY15 to about 92 million tonnes by FY18.

Finished steel demand outlook (Flats & Longs)

	CAGR (FY15-FY18)
Industrial Infra & Construction	5.7
Construction-Real Estate	5.3
Pipe Manufacturing	4.7
Engineering Units	7.3
Automobiles	7.1
Consumer Durables	7.3
Others	7.4

Domestic demand-supply scenario

While the domestic steel demand is likely to increase at a CAGR of about 6.3% during the period FY15 to FY18, the domestic supply of the metal, during the same period is likely to increase at a similar growth rate. However, given a competitive edge over cheap imported steel products, domestic steel producers have an option to improve upon their operating rates and push the Indian steel industry in a surplus state. CARE expects India's exports volumes to increase during the next 2-3 years while imports are expected to decline.

Steel Wire Ropes Industry

Wire ropes are a value-added product, formed from wire rods, which falls in the long steel category of steel products. Over the years, with significant improvement in the strength of wire ropes manufactured, the usage of these wire ropes has significantly increased in various diverse applications.

The value chain of the wire ropes industry covers manufacturing of wires through wire rods and further from wires to strands and ultimately wire ropes are produced from strands. Those players, who are present across the value chain, gain an advantage over other players in the market. However, there are hardly any players in the Indian market, which are present throughout the value chain. The value chain of the wire ropes industry can be best understood with the graph shown below.

The major sectors that drive the demand for the wire-ropes industry includes the sectors such as Engineering & Construction, Oil & Gas, Mining and the Shipping & logistics industry. As per industry estimates, the engineering & construction segment accounts for more than 60% of the end-use consumption share of the wire ropes industry. This includes demand from elevator ropes, aerial haulage, structural systems, general engineering ropes etc. Further, the oil & gas industry accounts for a share of another 20% (demand from offshore activities), followed by the mining industry, which accounts for a share of about 10%. Within the oil & gas industry, while the offshore segment generates demand for the wires ropes industry, the anchoring and mooring activity also requires the usage of different types of wire ropes.

Infrastructure - Only policy actions can set infrastructure growth

For the emerging economies, sustainable economic development depends upon the growth and investment in the infrastructure sector. Investment in the infrastructure sector has a very crucial & critical role to play in the economic growth of India. In the past few years, Indian economy has been adversely impacted due to a slowdown in infrastructural projects and activities. Slowdown in infrastructure projects is primarily on account of slowdown in investment activities within the sector. While new projects continue to get delayed, projects under implementation face the double whammy of low capital availability and changes in government regulations which poses a risk on the viability and sustainability of these projects.

BharatWire Ropes Limited

Funding requirement for any infrastructure project is long term in nature. The current cycle of high interest rates and uncertain political situation in the domestic markets is constraining infusion of private investment within the industry. The existing state of affairs has pushed the thrust solely on the government's initiatives for any potential growth in the infrastructure sector. The current political environment further restrains the growth in the infrastructure sector. The 11th Five Year Plan witnessed a similar outcome with almost half of the investment in the infrastructure sector being funded by the budgetary support (central and state governments), while debt accounting for share of 35% and the balance through equity or FDI.

As estimated by the planning commission, in order to achieve the government's illusive target of attaining 9 per cent real GDP growth, investment required in the infrastructure sector should be equivalent to almost 10 per cent of the GDP growth. In 2006-07 real term prices, this translates into an investment to the tune of about more than Rs.40 lakh crores during the 12th Five Year Plan. For any government, achieving this mammoth investment is a difficult task.

Steel wire ropes demand is influenced by the growth in infrastructure sector

The construction, engineering and the capital goods sectors account for a share of more than 60% of the end-use consumption pattern of the steel wire ropes industry. Growth in these sectors is highly co-related to the growth in investment in the infrastructure activity of an economy. Wire ropes finds application in many of the engineering and construction related activities such as material handling, mining, ports and shipping, construction equipment (structurals and cranes), construction of bridges, elevators and escalators etc.

Mining sector set to improve

Mining activity is expected to grow in the range of around 6-7% during the next five years. Insatiable demand for metallic minerals which form almost 88% of the total value of the mineral production is expected to support the growth of the mining industry. Power sector which is facing a huge deficit will continue to drive the demand for coal. Growth in the industrial sector is expected to keep the demand of metallic minerals intact.

Oil & Gas and the shipping industry

Average annual global rig count for CY14 was 3,578 rigs as against 2,174 rigs in CY03, registering a CAGR of about 4.6 per cent during the period. During CY09, average annual rig count witnessed a sharp decline of about 30 per cent YoY, when the oil price had significantly declined to a US\$ 33 per barrel and E&P activities had become economically unviable.

The key risks associated with the real estate sector are primarily the cyclical nature of business, interest rate fluctuations and changes in government policies. Any reversal in the economic cycle or adverse movement of interest rates, adversely affects the demand in the real estate industry. Rise in prices of land in the recent past is also a cause of concern for the industry. With global economic recovery yet to take a decisive step forward, the performance of the industry too seems to have taken a hit with its continuous decline in operating margins. CARE Research expects the long-term prospects for the real-estate sector to remain healthier driven by the huge demand from the housing sector. However, in the short-run, housing demand is expected to remain subdued given the inflationary pressures and high property prices. Currently, the industry is battling with the double-edge sword of high cost of capital and subdued demand. Going ahead, CARE Research expects the industry to grow at a CAGR of about 5-6 % during the next five years.

Automobiles - More vehicles on road

With the domestic automobile industry coming back on track, CARE Research estimates the industry to grow at a CAGR of about 7% during the next three years. While the short-term scenario appears to be highly jittery for the industry as persistence of economic uncertainty will continue to keep growth levels in check, nevertheless, over the medium to long-term period, CARE Research believes refurbishment of the economic buoyancy, increasing per capita income and low penetration is likely to drive the demand going forward.

BharatWire Ropes Limited

Domestic wires import-export trend

According to various industry estimates, India continues to remain a net importer of steel wires over the past several years. Owing to healthy domestic demand, net imports of steel wires into India have remained firm.

CARE Research tried to analyse the import-export trend of the domestic wires industry (2nd in the value chain) through which wire ropes are manufactured. The export-import data for wires indicated that India continues to remain a net importer of wires for the last seven years in a row ending FY14. In analyzing the import-exports trend, CARE Research also analysed the per unit realization of the exports and imports of wires in the domestic market. The table below indicates the export-import trend of the Indian wires industry.

EXECUTIVE SUMMARY

While China continues to remain as the world’s top producer of steel followed by the USA and Japan, the Indian steel industry remained the world’s fourth-largest steel producer for the fifth year in a row in CY14. With not much gap in production, India is closing in on USA and is expected to surpass it soon with the ongoing expansions by the steel players in India. Production in India has been on a rise with a CAGR of 8.4% from FY10-FY15. India has set ambitious targets to go up from the present installed capacity of about 101mtpa to as high as 300 mtpa by 2025. The per capita consumption of steel in India also continued to remain low as compared to other countries, indicating further potential growth of the domestic steel industry. The average per capita use of steel in India in 2014 was about 59 kg compared to the world average of 225 kg, so the domestic steel industry’s long-term prospects remain intact.

In the medium term as well, the leading steel producers in India have lined up plans to increase their steel capacity in line with the expected increase in the domestic consumption of steel. However, CARE Research believes, with the current pace of expansion, the Indian steel industry over the next 3-4 years is only likely to add another 15 million tonnes of capacity, taking the domestic steel capacity at around 115 mn tonnes by FY18.

Wire ropes are a value-added product, formed from wire rods, which falls in the long steel category of steel products. Over the years, with significant improvement in the strength of wire ropes manufactured, the usage of these wire ropes has significantly increased in various diverse applications.

DOMESTIC OUTLOOK

Domestic demand outlook

Registering a CAGR of about 8%, India has more than doubled its finished steel consumption from about 30 million tonnes in FY03 to 76 million tonnes in FY15. During the same period, finished steel production grew at a marginally slower pace as compared to the growth in demand, growing at a CAGR of about 7.7%. While the domestic steel industry has recorded a robust growth in the past, the current situation has seen a dramatic shift. In comparison to the steel demand CAGR of about 7.5% achieved during the period FY10-13, domestic steel demand grew at a modest CAGR of about 2% during FY13-15. Nevertheless, the situation in the domestic market is akin to the global steel industry, which continues to remain highly

volatile.

Although the domestic demand in FY15 increased at a higher growth rate of about 3%, when compared with the growth achieved during FY14 (0.83%), the demand growth in the domestic market continues to remain far lower than the growth achieved during the previous years. The slower growth achieved in demand was primarily on account of policy paralysis, which had its toll on the infrastructural activities in the domestic markets. Elevated inflationary and interest rate pressure for a prolonged period further had its impact on the automobile and the consumer durables industry, thereby affecting the steel off-take from these sectors.

Going ahead, CARE Research expects the domestic steel demand to grow at a CAGR of about 6.3% during the next three years (FY15 to FY18). Domestic demand is likely to grow from about 76 million tonnes in FY15 to about 92 million tonnes by FY18.

Domestic supply

Indian steel industry responded positively by increasing its capacity to cater to the increase in demand from the domestic market. Domestic steel capacity increased at a CAGR of 7.7% from about 48 million tonnes in FY05 to about 101 million

tonnes in FY15. In line with the domestic steel capacity, steel production also recorded a similar increase during the same period.

While the demand outlook continues to remain volatile, domestic steel industry is witnessing a continuous rise in crude steel capacity. Going ahead, CARE Research expects domestic steel capacity to increase at a CAGR of about 5% during FY15-FY18, marginally at a slower pace when compared with the expected increase in domestic steel demand.

Domestic demand-supply scenario

While the domestic steel demand is likely to increase at a CAGR of about 6.3% during the period FY15 to FY18, the domestic supply of the metal, during the same period is likely to increase at a similar growth rate. However, given a competitive edge over cheap imported steel products, domestic steel producers have an option to improve upon their operating rates and push the Indian steel industry in a surplus state. CARE expects India's exports volumes to increase during the next 2-3 years while imports are expected to decline.

Optimistic demand growth to improve Operating rates

Against all odds, India continues to remain globally competitive in steelmaking, with its competencies like abundance of iron ore and low labour costs offsetting impediments like scarcity of coking coal and relatively high cost of finance. Most of the large integrated steel producers in India are actively involved in increasing their current crude steel capacity through various greenfield and brownfield projects. With the commissioning of these capacities, domestic steel volumes are expected to increase at a robust rate. While domestic steel demand is likely to show an improvement, Indian steel makers are also targeting the exports market especially the other Asian and Middle East countries. While India's exports volumes are expected to improve, lower imports will benefit the domestic steel makers to improve upon their current operating rates.

Outlook on sectors driving domestic steel demand

Domestic steel demand can be broadly categorized into demand for flat steel products and the demand for long products. While the demand for flat products in the domestic market is likely to be supported by the engineering, automobiles and the pipe-manufacturing sector, the demand for long products will continue to increase on the back of an expected improvement in the infrastructure and the construction sector. According to CARE Research estimates, demand for flat products during the next 3-4 years is likely to grow at a CAGR of about 6.6%, while the demand for long products during the same period is likely to grow at a CAGR of about 6%.

Apart from analyzing the domestic steel demand from the major end-user industries, CARE Research in the below section also focuses on how these sectors are also driving the demand for the steel wire ropes industry.

Wire ropes are a value-added product, formed from wire rods, which falls in the long steel category of steel products. Over the years, with significant improvement in the strength of wire ropes manufactured, the usage of these wire ropes has significantly increased in various diverse applications.

The value chain of the wire ropes industry covers manufacturing of wires through wire rods and further from wires to strands and ultimately wire ropes are produced from strands. Those players, who are present across the value chain, gain an advantage over other players in the market. However, there are hardly any players in the Indian market, which are present throughout the value chain. The value chain of the wire ropes industry can be best understood with the graph shown below.

Infrastructure - Only policy actions can set infrastructure growth

For the emerging economies, sustainable economic development depends upon the growth and investment in the infrastructure sector. Investment in the infrastructure sector has a very crucial & critical role to play in the economic growth of India. In the past few years, Indian economy has been adversely impacted due to a slowdown in infrastructural projects and activities. Slowdown in infrastructure projects is primarily on account of slowdown in investment activities within the sector. While new projects continue to get delayed, projects under implementation face the double whammy of low capital availability and changes in government regulations which poses a risk on the viability and sustainability of these projects.

Funding requirement for any infrastructure project is long term in nature. The current cycle of high interest rates and uncertain political situation in the domestic markets is constraining infusion of private investment within the industry. The existing state of affairs has pushed the thrust solely on the government's initiatives for any potential growth in the infrastructure sector. The current political environment further restrains the growth in the infrastructure sector. The 11th Five Year Plan witnessed a similar outcome with almost half of the investment in the infrastructure sector being funded by the budgetary support (central and state governments), while debt accounting for share of 35% and the balance through equity or FDI.

Infrastructure investment as a per cent of GDP in different Five Year Plans

Source: Planning commission

As estimated by the planning commission, in order to achieve the government's illusive target of attaining 9 per cent real GDP growth, investment required in the infrastructure sector should be equivalent to almost 10 per cent of the GDP growth. In 2006-07 real term prices, this translates into an investment to the tune of about more than Rs.40 lac crores during the 12th Five Year Plan. For any government, achieving this mammoth investment is a difficult task.

Steel wire ropes demand is influenced by the growth in infrastructure sector

The construction, engineering and the capital goods sectors account for a share of more than 60% of the end-use consumption pattern of the steel wire ropes industry. Growth in these sectors is highly co-related to the growth in investment in the infrastructure activity of an economy. Wire ropes finds application in many of the engineering and construction related activities such as material handling, mining, ports and shipping, construction equipment (structurals and cranes), construction of bridges, elevators and escalators etc.

Investments in projects by the manufacturing sector

Source: CMIE and CARE Research

Going ahead, CARE Research believes, with the new government's increased focus on the manufacturing industry through its initiatives such as "Make in India" campaign, is likely to further boost investment in the manufacturing sector in turn giving a thrust to the domestic steel wire ropes consumption.

Mining sector set to improve

Large and small material handling equipment make use of various types of steel wire ropes. These material handling equipment (along with cranes and other engineering goods) are extensively used by the mining industry.

Minerals constitute the back-bone of economic growth of any nation and India has been eminently endowed with mineral resources. India produces about 87 minerals, which include 4 fuel minerals, 10 metallic, 48 non-metallic, 3 atomic and 24 minor minerals. For FY14, mining sector accounted for 2.11% of the GDP of the country (decline on 0.2% Y-o-Y). The total value of mineral production (excluding atomic minerals) during 2013-14 has been estimated at Rs.2.3 tn, a Y-o-Y decline of about 9%.

Investments in the domestic mining sector

Source: CMIE and CARE Research

Mining activity is expected to grow in the range of around 6-7% during the next five years. Insatiable demand for metallic minerals which form almost 88% of the total value of the mineral production is expected to support the growth of the mining industry. Power sector which is facing a huge deficit will continue to drive the demand for coal. Growth in the industrial sector is expected to keep the demand of metallic minerals intact.

Oil & Gas and the shipping industry

Major demand for the steel wire ropes industry is also derived from the oil & gas and the shipping industry. While the offshore and onshore rigs extensively use the steel wire ropes for their exploration activity, the same is used by the shipping industry in applications such as anchoring and mooring of ships. Steel wire ropes are also extensively used by the shipyards in the ship-building activity. CARE Research analysed the trend in the global rig counts and the domestic shipping industry to understand the demand for steel from these end-user industries.

Global rig count

Average annual global rig count for CY14 was 3,578 rigs as against 2,174 rigs in CY03, registering a CAGR of about 4.6 per cent during the period. During CY09, average annual rig count witnessed a sharp decline of about 30 per cent YoY, when the oil price had significantly declined to a US\$ 33 per barrel and E&P activities had become economically unviable.

Average global rig count for CY14 was at 3,578 rigs as against 3,412 rigs during CY13. This rise is majorly attributable to the rise in average rig count in US, Africa and Middle East regions. However, average global rig count for the first four months of CY15 (January-April), declined to about 2,780 rigs as compared to about 3,580 rigs during the same period previous year. This sharp decline was again due to the significant decline in global crude oil prices in the past 6 months.

Real estate demand striving for real improvement

The real estate sector is a major employment driver, being the second-largest employer, next only to agriculture. This is because the chain of backward and forward linkages that the sector has with the other sectors of the economy, especially with the housing and construction sector. Demand for the real estate industry can be categorized mainly into three segments viz: residential, commercial and retail. In the past few decades, rising population, increasing trend of urbanisation, improving income levels of a growing middle class, nuclearisation of families and tax incentives provided momentum to the demand for housing. Demand for commercial real estate was mainly driven by the flourishing services industry especially the IT and BPO sectors. However, the sector continues to remain highly fragmented with many regional players who have a significant presence in their respective local markets.

The key risks associated with the real estate sector are primarily the cyclical nature of business, interest rate fluctuations and changes in government policies. Any reversal in the economic cycle or adverse movement of interest rates, adversely affects the demand in the real estate industry. Rise in prices of land in the recent past is also a cause of concern for the industry. With global economic recovery yet to take a decisive step forward, the performance of the industry too seems to have taken a hit with its continuous decline in operating margins. CARE Research expects the long-term prospects for the real-estate sector to remain healthier driven by the huge demand from the housing sector. However, in the short-run, housing demand is expected to remain subdued given the inflationary pressures and high property prices. Currently, the industry is battling with the double-edge sword of high cost of capital and subdued demand. Going ahead, CARE Research expects the industry to grow at a CAGR of about 5-6 % during the next five years.

Automobiles - More vehicles on road

With the domestic automobile industry coming back on track, CARE Research estimates the industry to grow at a CAGR of about 7% during the next three years. While the short-term scenario appears to be highly jittery for the industry as persistence of economic uncertainty will continue to keep growth levels in check, nevertheless, over the medium to long-term period, CARE Research believes refurbishment of the economic buoyancy, increasing per capita income and low penetration is likely to drive the demand going forward.

Category-wise automobile sector demand

Source: CARE Research
F:forecasted

India has transpired as a low-cost automobile manufacturing destination on account of its low-cost labour, healthy auto-component industry and indigenous availability of inputs. India is thus being looked as the hub for automobile manufacturing, which would drive exports. Apart from a recovery in domestic demand, automobile exports are also likely to witness a healthy growth during FY15 to FY18.

Steel Wire Ropes Industry

The major sectors that drive the demand for the wire-ropes industry includes the sectors such as Engineering & Construction, Oil & Gas, Mining and the Shipping & logistics industry. As per industry estimates, the engineering & construction segment accounts for more than 60% of the end-use consumption share of the wire ropes industry. This includes demand from elevator ropes, aerial haulage, structural systems, general engineering ropes etc. Further, the oil & gas industry accounts for a share of another 20% (demand from offshore activities), followed by the mining industry, which accounts for a share of about 10%. Within the oil & gas industry, while the offshore segment generates demand for the wires ropes industry, the anchoring and mooring activity also requires the usage of different types of wire ropes.

Domestic wires import-export trend

According to various industry estimates, India continues to remain a net importer of steel wires over the past several years. Owing to healthy domestic demand, net imports of steel wires into India have remained firm.

CARE Research tried to analyse the import-export trend of the domestic wires industry (2nd in the value chain) through which wire ropes are manufactured. The export-import data for wires indicated that India continues to remain a net importer of wires for the last seven years in a row ending FY14. In analyzing the import-exports trend, CARE Research also analysed the per unit realization of the exports and imports of wires in the domestic market. The table below indicates the export-import trend of the Indian wires industry.

Our Company plans to create awareness about our capabilities, our products and their quality by advertising in the relevant print media, participation in industrial trade exhibition and presentations to large scale customers. We will also focus on conducting technical workshops, seminars for customers/large scale end users to enhance their knowledge of rope applications and technical characteristics of ropes. Our Company proposes to set-up branch offices in major cities where our major end-users are based to provide greater client-interfacing. For the purpose of catering to a large customer base, we propose to increase our distribution network by identifying and appointing dealers across all major cities. Further, our Company aims to procure product approvals/registrations from/with all major engineering consultants and equipment suppliers. Our Company would also aim to build-up our sales force which will enable us to effectively market our products. In this regard, our Company will make efforts for formation of a core marketing and technical team for customer development, brand building and continuous market survey and establishment of an after sale service team for customer feed-back and customer satisfaction and attending customer complaints.

Focus on development of international markets for our products

We plan to enhance our presence in the international market by introducing a wider range of products that adhere to international standards. Our initial approach will be of offering products at competitive prices and then eventually offering high quality products at premium prices.

We serve the South African and African and the Middle Eastern markets through some of the local wire rope dealers. With increase in product range and improved quality of the products, we propose to make them the exclusive dealers of our Company and thereby enhancing the range of products provided to such exclusive dealers, which will include mining, port, forestry, oil and gas, structural strands / ropes and other general engineering ropes.

Our other target markets are USA, Canada, Brazil, South-East Asia, Singapore, Middle East, Russia, Africa, Europe and Australia. Our Company proposes to create a separate marketing team at our Head Office to co-ordinate with our local representatives, to be appointed, in all major strategic locations in the international markets in which we intend to sell our products

For servicing the South East Asian countries, Australia and Vietnam, we propose to set up a ware house and sales office in Singapore, which owing to its infrastructure facilities in respect of ports, would serve as a suitable export hub. We also intend to enter the Russian and European markets by establishing a network of dealers.

We propose to set up a stocking point in Houston or Louisiana either on our own or through a franchising model to cater to the oil and gas, mining, shipping, port, elevator, cranes and general material handling ropes segments of rope consumers in the USA, Brazil and Canada to instantly service the customer requirements. We believe that our strategy in focusing both, on further developing our existing markets and expanding into new markets with high growth potential will enable us to effectively capture growth opportunities in different parts of the world, broaden our revenue base and reduce risks of volatility of market conditions and price fluctuations which may result from concentrating our resources in any particular geographical region.

Strengthening of product portfolio and developing capabilities to manufacture a wider range of products

It is our endeavor to constantly improve quality of wire ropes as well as increase the range of wire ropes to cater to our customers' requirements both within our own product framework. At our Proposed Project, we intend to manufacture wires independently, thereby eliminating our dependency on the limited types of wires available in the market and enabling us to manufacture and offer an increased range of wire rope products, including but not limited to marketing high performance crane ropes for ports, large diameter spiral strands for structures and bridges, elevator ropes, high performance mining ropes, long-life-cycle fishing ropes, onshore and offshore ropes and special ropes for construction sector. Our product range will cover all types of ropes from 6 mm to 125mm, tensile grade upto 2160, plasticated, compacted, galvanised and black. We believe that this this will enhance visibility of our brand and have a substantial increase in our profitability in future.

Meeting Quality Standards and developing customer focus

Our driving force has always been the quality of our products, as the same would enable us for long standing relationship with our customers. Our technically qualified persons are determined to achieve the objective of zero defects and zero rejection. To complement the efforts of our technical team, our Proposed Project will be equipped with testing facilities to ensure that all our products are thoroughly tested prior to dispatch from our factory. Our testing and development laboratory will play an integral role in making improvements in design and quality of our products and development of special products. We believe these high quality tools will achieve the various technical parameters for physical and chemical properties of different types and sizes of wire rope products. Further, we propose to enhance our efficiency by introducing advanced machinery and reducing our dependency on manual labour thereby capitalizing our method of production. For servicing our growing need for a standard grade of wire rods, we propose to establish formal tie-ups under rate contracts with reputed wire rod manufacturers. This will enable us to achieve our aim of providing quality products on a continuous basis.

PRODUCT PORTFOLIO

➤ **WIRE ROPE**

A wire rope consists of multiple strands which are laid symmetrically around the central core. The core can be a steel rope which is known as Independent Wire Rope Core or a steel strand which is known as Wire Strand Core or made of non-steel material fiber like polypropylene, jute and sisal. A predetermined number of wires of the same or different size are fabricated in a uniform arrangement of lay to form a strand. The strand consists of predetermined number of wires of the same or different size which is fabricated in a uniform arrangement of lay. The strands are then laid together symmetrically around the core to form the rope. The wires, which are the main raw material, could be of any strength contingent on the customer specifications pertaining to minimum breaking load and its end use. The number of wires that form a strand is also contingent on the customer specification and its end use. Principally, wire ropes are distinguished by the number of strands per wire rope and the number of wires in each strand.

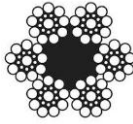

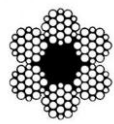

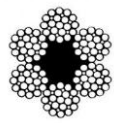

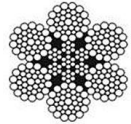

Principally, wire ropes are distinguished by following major factors:

- Diameter.
- Galvanized or un-galvanized.
- Lubricated or dry / bitumin based or Petroleum based.
- Grade of wire - 1420, 1570, 1770, 1960, 2160 N/mm sq.
- Construction in terms of the number of strands in the rope and the number of wires in the strand.
- Type of core.
- Lays in wire rope.
- Compacted wire ropes.
- Rotation property - Non-Rotating wire ropes.
- Cushion Core IWRC Plasticated Rope.

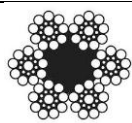

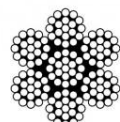

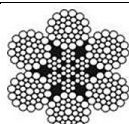

The detailed descriptions of some of the distinguishing features of the wire ropes are under:

➤ **Construction in terms of the number of strands in the rope and the number of wires in the strand**

The following are the various types of strand constructions:

Ordinary construction: The diameter of all wires used on the outside as well as inside of the strand is same. The number of wires in outer layer is more than inner layer.	
Scale (S) construction: Larger diameter wires are used on the outside of the strand and smaller wires are used inside of the strand. The number of wires in outer layers is equal to inner layer.	
Warrington (W) construction: Alternate wire are large and small. The number of wires in outer layer is double that of inner layer.	
Filler construction: Small wires are filled in the valleys between the inner and outer layer.	
Scale-Warrington (SW) construction: It is a multi-layer construction typically having 4 layers, where the inner layers are Warrington type and outer layers are Seale type.	

➤ Type of core

Fiber Core consisting of jute, sisal, poly propylene (F).	
Wire strand core (WSC).	
Independent Wire Rope Core (IWRC).	

Lays in wire rope

The term lay refers to the direction of the twist of the wires in a strand and the direction that the strands are laid in the rope. In Langs-lay rope, both the wires in the strand and the strands in the rope are laid in the same direction. In the Ordinary rope, the wires are laid in one direction and the strands are laid in the opposite direction. There are five types of lays used in wire ropes which are described below:

- **Right Regular Lay:** The wires in the strands are laid to the left, while strands are laid to the right to form the wire rope.
- **Left Regular Lay:** The wires in the strands are laid to the right, while the strands are laid to the left to form the wire rope.

- **Right Lang Lay:** The wires in the strands and the strands in the rope are laid in the same direction; in this instance, the lay is to the right.
- **Left Lang Lay:** The wires in the strands and the strands in the rope are also laid in the same direction; in this instance, the lay is to the left (rather than to the right as in the right lang lay).
- **Alternate Lay:** The wires in one strand are laid to the right, the wires in the nearby strand are laid to the left, the wires in the next strand are laid to the right, and so forth, with alternate directions from one strand to the other. Then all strands are laid to the right.

➤ Compacted wire ropes

For a compacted wire rope, compaction is done to the outer strands by physically rolling the strand between rollers during strand production. The purpose of compaction is to increase the metallic area in the strand and to increase the breaking load of the rope, so that same diameter of the rope can perform heavier operation within the same mechanical equipment. Secondly and most importantly, due to the flattened surface area, such ropes have greater contact area with the pulley and thereby less wear and tear and prolonged life.

➤ Rotation property - Non-Rotating wire ropes

Generally all ropes exhibit rotational tendency during loading and unloading. This is nullified by multi-layering in the pulleys thereby counter-balancing the torque. However, in case of very high single fall application such ropes cannot be used since the ropes will get twisted and the basic operation will get jeopardized. For such applications, non-rotating ropes are used which do not rotate under load. Such ropes are termed as “Torque Balanced Rope” or “Rotation-Resistant Rope”.

The non-rotating ropes are multi-strand ropes, typically consisting of 19 or 35 strands and each strand having 7 or 19 wires depending on the rope diameter.

The rope has two parts –inner and outer. The inner cover is laid in one direction and the outer cover in opposite direction. Therefore during loading or unloading when inner layer moves in one direction, the outer layer turns in opposite direction, thereby balancing each other.

➤ ***Cushion Core IWRC Plasticated Rope.***

The IWRC is plastic- impregnated and the outer strands are closed in hot condition so that some plastic flows in between the outer strands and thereby separating all strands from each other and core. This reduces inter-layer friction during operation and thereby increasing the rope life.

➤ **STRUCTURAL STRANDS**

Structural strands, popularly known as spiral strands are fully galvanized strands that are produced layer by layer in sequence of 1-6-12-18-24-30-36-42-48-54-60 depending on the final diameter. During construction each layer is laid opposite to the previous layer to counter-balance the load-torque. The spiral strands are static ropes that are used as supports in cable-stay/suspension bridge, boom suspension, guying of tall masts etc. Depending on the application and environment in which the strand is used, the galvanized coating is of different classes such as normal (Class A), medium (Class B) or extra heavy (Class-C).

➤ **SLINGS**

Slings are value added products of wire ropes and strands. They are components of the hoisting and rigging systems to lift and move loads. They are generally made of right hand ordinary lay wire rope of different constructions depending upon usage. Slings are designed based on the application, and the end fitting and rope are selected accordingly. Slings are made from both, galvanized and black ropes, steel core as well as fiber core depending on the application. The broad categories of slings produced by us are as follows:

■ ***Hand-spliced Sling***

The Hand-spliced sling is made by tucking or locking the wire rope strand under the other adjacent strand with or without thimble.

■ **Mechanically spliced sling**

Mechanically spliced sling is fabricated by using metal sleeve (aluminum ferrule or steel sleeve) which is slipped over the ends and pressed to secure the ends to the sling body. Hydraulic swaging press with special dies is added to bond the sleeve in place.

■ **Socketed**

Wires of wire rope or strand are opened up and melted zinc is poured in socket after inserting opened wires in socket for bonding of opened wires into socket.

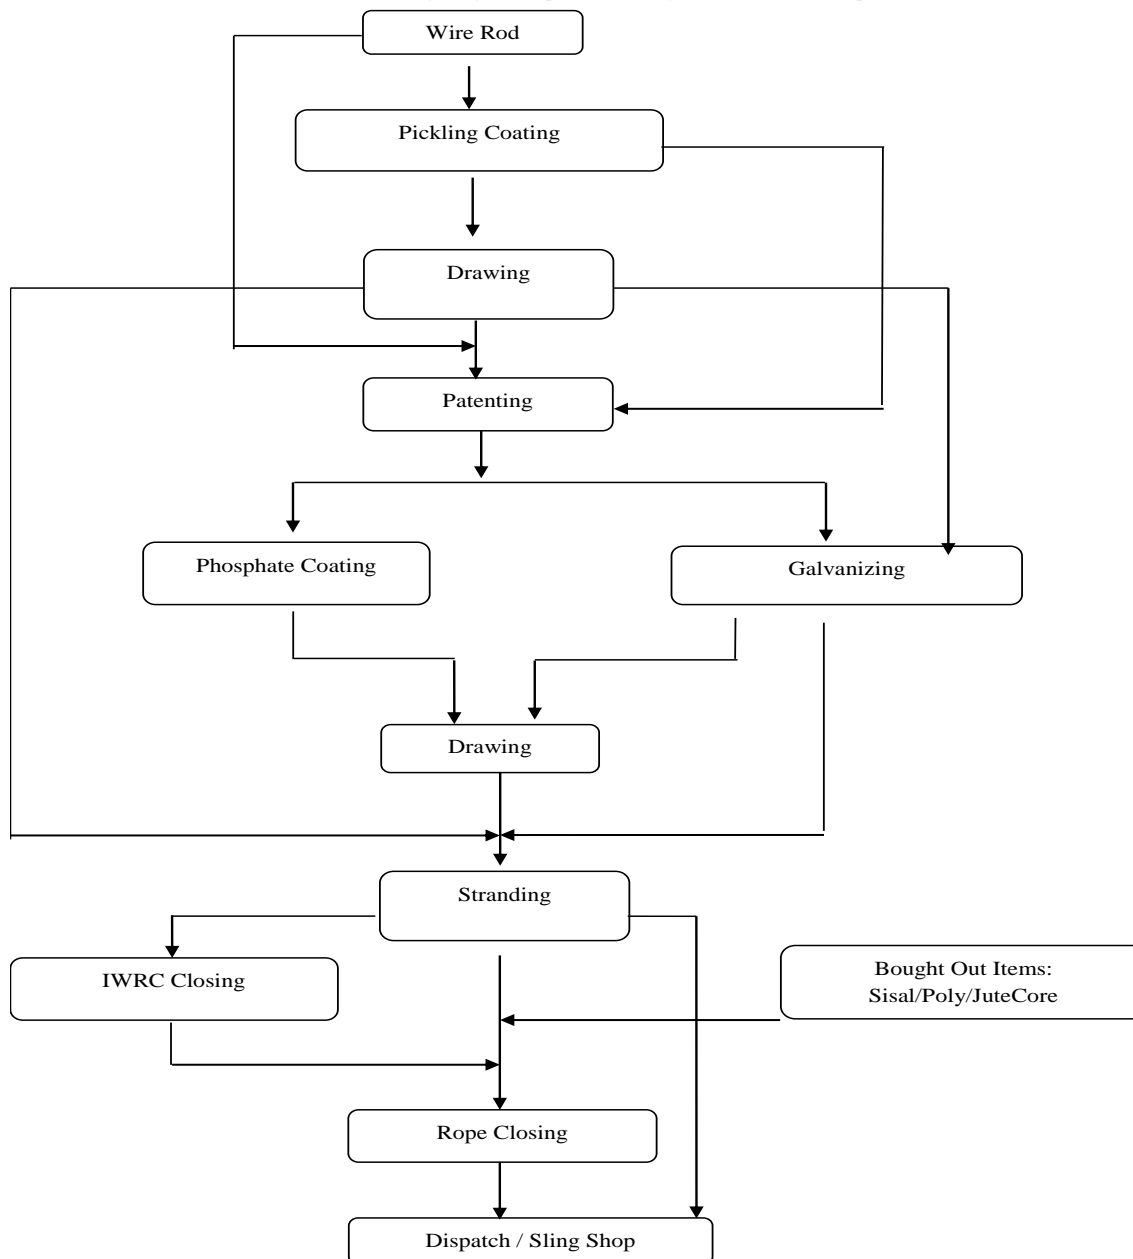

➤ **WIRE**

Steel wire is intermediary product of rope manufacturing, which is also sold by us as finish products to various consumers of wires. The wire is drawn from steel wire rod of various thickness and chemistry. The thickness of the wire is usually in the range of 0.30 to 5 mm. The wires manufactured by us are both galvanised and un-galvanised, patented or direct drawn.

MANUFACTURING PROCESS

Process flow for the production of Wire and Wire Rope

➤ Raw material inspection and testing

The principal raw material used by us for manufacturing wire ropes is the wire rod. The wire rods used in the wire rope manufacturing process are typically high carbon steel. Zinc is used for galvanizing the steel wire either before or after the drawing process.

Inspection and testing of the raw materials is the first stage in the rope manufacturing process. Initially, the raw materials are subjected to visual inspection for any surface defects or major damage that might have occurred during transportation.

The wire rods are then subjected to in-house testing carried out at well-equipped laboratories to verify their chemical composition in respect of the ratios of various chemicals such as carbon, sulphur, phosphorous, manganese etc. as well as their mechanical properties such as tensile strength, yield strength, etc.

➤ **Pickling**

The pickling process removes surface scales comprising of iron oxides and other impurities. Depending upon the process, the pickling is done either in line or in the fully automatic batch pickling plant. In the fully automatic pickling unit, the coils of wire rods are automatically transported from one bath to another and held for pre-determined time in each bath. After the acid baths, the coils are rinsed in water in order to remove the acid from the rod. Subsequently, the coil is coated with phosphate by dipping in a phosphate bath and finally neutralized by dipping in borax solution.

➤ **Drawing**

The process of wire drawing consists of pulling a metal wire through a small circular opening called a die. This process results in plastic deformation with a reduction in its cross sectional area. The pulling force is dependent on the strength of the material and degree of reduction. A larger reduction would require greater force.

Typically the reduction in area through a die is in the region of 14% to 22%. For greater reduction the wire is drawn through a series of dies. However, successive reductions increase the hardness and reduce the ductility. After a certain stage it is not possible to draw any further and it is necessary to perform heat treatment, known as patenting, to relieve internal stress and regain ductility for drawing.

➤ **Patenting**

The wire is subjected to a heat treatment process known as patenting. The wire is heat treated in a continuous furnace, wherein the wire is subjected to controlled heating in the furnace and controlled cooling by quenching in lead bath.

Patenting is necessary due to the following reasons:

- to obtain uniform grain structure
- to improve ductility; and
- to remove internal stress.

➤ **Galvanising**

Galvanising is the process of coating zinc on the surface of steel for preventing corrosion. The zinc coating renders zinc iron alloy on the surface which is stable and protects the parent metal from corrosion. The hot dip galvanizing process is the oldest and most used in the wire industry. The steel is first dipped in the flux solution to prepare the surface for zinc adherence and good bonding between the steel and zinc. The steel is dipped into molten zinc at 450 C, and reaction is initiated between steel and zinc. The quantum of free zinc on the alloy layer depends on the wire speed, wiping methodology and zinc temperature.

➤ **Secondary Drawing**

After galvanization/phosphate coating, in order to achieve required tensile and diameter of the wire as per the design of the final rope, the wire is subjected to secondary drawing.

➤ **Stranding**

Stranding is the process wherein the bunch of wires are laid helically in a rotating machine to produce the strand. The wires that are loaded in the cradles inside the rotating tube are pulled through a die by the capstan. The speed of the capstan is so adjusted that the strand is formed as per the designed lay or pitch.

➤ Closing

Closing is the process wherein the strands produced in the stranding process above are laid around the core in a predetermined arrangement. The core can be fibre or independent wire rope core. This process is similar to the process of stranding and is done in a rotating machine popularly known as closing machine.

➤ Final testing

Finally, the rope is tested physically for straightness, formation, gaps, tightness and most importantly evaluation of breaking load by subjecting the rope to continuously increase in load between grips till the rope breaks.

➤ Slings

After the final testing is carried out on the wire ropes, depending on the end-use of the product, wire ropes may be used for further manufacturing of slings. Slings are ropes having loops at both its ends and are typically used for lifting heavy equipment by lifting devices like cranes. Splicing is done to make the eye formation of ropes manually by weaving the strands into each other or by mechanically pressing the rope inside a ferrule in a hydraulic press. A portable splicing machine is used for smaller diameter ropes and hydraulic press is used for larger size ropes.

REGULATIONS REGARDING FOREIGN INVESTMENT

Foreign investment in companies in the wire rope manufacturing industry is governed by the provisions of the Foreign Exchange Management Act, 1999 ("FEMA") read with the applicable regulations. The Department of Industrial Policy and Promotion ("DIPP"), Ministry of Commerce and Industry has issued the Consolidated FDI Policy (the "FDI Circular") which consolidates the policy framework on Foreign Direct Investment ("FDI"), with effect from May 12, 2015. The FDI Circular consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP till May 11, 2015. All the press notes, press releases, clarifications on FDI issued by DIPP till May 11, 2015 stand rescinded as on May 12, 2015.

Foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the approval route, depending upon the sector in which foreign investment is sought to be made. Under the approval route, prior approval of the Government of India through FIPB is required. FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the FIPB, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where FIPB approval is obtained, no approval of the RBI is required except with respect to fixing the issuance price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company. The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident outside India) Regulations, 2000 to prohibit, restrict or regulate, transfer by or issue security to a person resident outside India.

The Consolidated FDI Circular dated May 12, 2015 issued by the DIPP does not prescribe any cap on the foreign investments in the sector in which the Company operates. Therefore, foreign investment up to 100% is permitted in the Company under the automatic route. No approvals of the FIPB or the RBI are required for such allotment of equity Shares under this Issue. The Company will be required to make certain filings with the RBI after the completion of the Issue.

RBI has also issued Master Circular on Foreign Investment in India dated July 01, 2015, which is valid till June 30, 2016. In terms of the Master Circular, an Indian company may issue fresh shares to persons resident outside India (who are eligible to make investments in India, for which eligibility criteria are as prescribed). Such fresh issue of shares shall be subject to inter-alia, the pricing guidelines prescribed under the Master Circular. Annexure - 46: Details of Capital Reserve and Investment Allowance Reserve, as Restated

Company has not revalued its assets in the last five years. However, It is observed that Capital Reserve on revaluation of Assets of Rs 2.40 Lacs and Investment allowance reserve of Rs. 45.60 Lacs appearing in the audited balance sheet as on March 31, 2004(last available original audited financial statement with current management) signed by previous statutory auditor, dated October 14, 2004, and Capital Reserve on revaluation of Assets of Rs 45.60 Lacs and Investment allowance reserve of Rs. 2.40 Lacs appearing in audited balance sheet as on March 31, 2005 also signed by same statutory auditor, dated October 19, 2005. This same amount with different nomenclature reclassified in subsequent audited balance sheets, and is appearing as capital reserve in audited balance sheet as on November 30, 2015.

Due to limited availability of appropriate, complete and reliable records, actual amount of revaluation reserve, year of creation and break up of assets which had been revalued are not ascertainable. Hence no effect of reversal of reserve to the extent of depreciation on revalued assets have been made to depreciation, assets and revaluation reserve in any of the restated period, which may have resulted in understatement of profitability of every year to that extent.

The quantum of understatement of profit, which is not material due to size of reserve/ age of reserve, is not accurately ascertainable since correct details about year of revaluation, amount of revaluation and assets on which revaluation has been made are not available with current management of the company.

However in the calculation of Net Worth, book value per equity share we are considering share capital and reserve & surplus excluding above mentioned capital reserve of Rs. 48 Lacs.

MAT is a tax on book profits that was introduced by the Government of India starting in Fiscal 1997. MAT is applicable only if the tax payable under the MAT provisions is greater than the tax on taxable income calculated at the normal rates.

Deferred tax

Deferred tax arises from timing differences between book profits and taxable (accounting) profits that originates in one period and is capable of reversal in one or more subsequent periods. It is measured using tax rates and laws that have been enacted or substantively enacted as on the date of the balance sheet. We provide for deferred tax liability on such timing differences, subject to prudent considerations in respect of deferred tax assets. The significant timing differences include the difference in depreciation charged to the Statement of Profit and Loss and the depreciation claimed under the Income Tax Act, 1961 ("Income Tax Act"), the items of expenditure covered under sections 43B and 145A of the Income Tax Act and the unabsorbed depreciation and carried forward business losses.

Effect of Inflation

We are affected by inflation as it has an impact on the raw material cost, wages, etc. In line with changing inflation rates, we rework our margins so as to absorb the inflationary impact.

Credit Risk

We are exposed to credit risk on monies owed to us by our customers. If our customers do not pay us promptly, or at all, we may have to make provisions for or write-off such amounts.

Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of the Bid cum Application Form and in the RHP / Prospectus. For details in relation to allocation, the Bidder/ Applicant may refer to the RHP / Prospectus.
- (b) Under-subscription in Retail Portion is allowed to be met with spill-over from any other category or combination of categories at the discretion of the Company and in consultation with the BRLMs and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Portion is not available for subscription to other categories.
- (c) In case of under subscription in the Net Issue, spill-over to the extent of such under-subscription may be permitted from the Reserved Portion to the Net Issue. For allocation in the event of an under-subscription applicable to the Company, Bidders/ Applicants may refer to the RHP.

Illustration of the Book Building and Price Discovery Process.

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹ 20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of 5 (five) Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Company at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Company is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.0 in the above example. The Company, in consultation with the BRLMs, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.0. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

(e) **Alternate Method of Book Building (not applicable in our case)**

In case of FPOs, companies may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of bidding (“**Alternate Book Building Process**”).

The company may specify the Floor Price in the RHP or advertise the Floor Price at least 1 (one) Working Day prior to the Bid/ Issue Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIIs, NIIs and Employees are Allotted Equity Shares at the Floor Price and allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the allotment may be done on a proportionate basis. Further, the company may place a cap either in terms of number of specified securities or percentage of issued capital of the Company that may be allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/ or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE (not applicable in our case)

Applicants may note that there is no Bid cum Application Form in a Fixed Price Issue. As the Issue Price is mentioned in the Fixed Price Issue therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the application form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through Syndicate member(s)/ SCSB and/ or Registered Broker or RTAs or CDPs.

Applicants may submit an Application Form either in physical form to the Syndicate member(s) or Registered Brokers or RTAs or CDPs or the Designated Branches of the SCSBs or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only (“ASBA Account”). The Application Form is also made available on the websites of the Stock Exchanges at least 1 (one) day prior to the Bid/ Issue Opening Date.

In a fixed price Issue, allocation in the net Issue to the public category is made as follows: minimum fifty per cent to Retail Individual Investors; and remaining to (i) individual investors other than Retail Individual Investors; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. - (b) In the second instance, allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Portion, all QIBs who have submitted Bids above the Issue Price may be Allotted Equity Shares on a proportionate basis for upto 95% of the QIB Portion; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Portion, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIIs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Issue being over-subscribed, the Company may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations, 2009.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- (a) Bidders may be categorized according to the number of Equity Shares applied for;
- (b) The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of

Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;

- (c) The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- (d) In all Bids where the proportionate allotment is less than the minimum bid lot decided per Bidder, the allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Company;
- (e) If the proportionate allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number. Allotment to all bidders in such categories may be arrived at after such rounding off; and
- (f) If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate allotment to the successful Bidders in that category. India's current Foreign Direct Investment ("FDI") Policy issued by the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, GOI ("DIPP") by Consolidated FDI Policy Circular of 2015 with effect from May 12, 2015 ("Consolidated FDI Policy Circular of 2015") consolidates and subsumes all previous press notes, press releases and clarifications on FDI issued by the DIPP. The Government usually updates the consolidated circular on FDI Policy once every Year and therefore, Consolidated FDI Policy Circular of 2015 will be valid until the DIPP issues an updated circular.
